sviluppati negli ultimi 5 anni**

HAPPY CUSTOMERS

**Aziende che hanno adottato
soluzioni HCM, molte in Cloud,
sviluppate da Altevie.**

PROCESSI E PERSONE

Le nostre Soluzioni SAP HCM sono applicate in 30 ambiti applicativi e processi diversi, su cloud, on premise, e ibride.

Abbiamo un team di 15 persone certificate su SAP HR.

Personas and their needs

End user

Make decisions to drive business based on real insights and information

Line of Business

Drive business innovations and improve time-to-value of new solutions

IT Admin

Support cross-organization and LOB while managing an efficient landscape

Developer

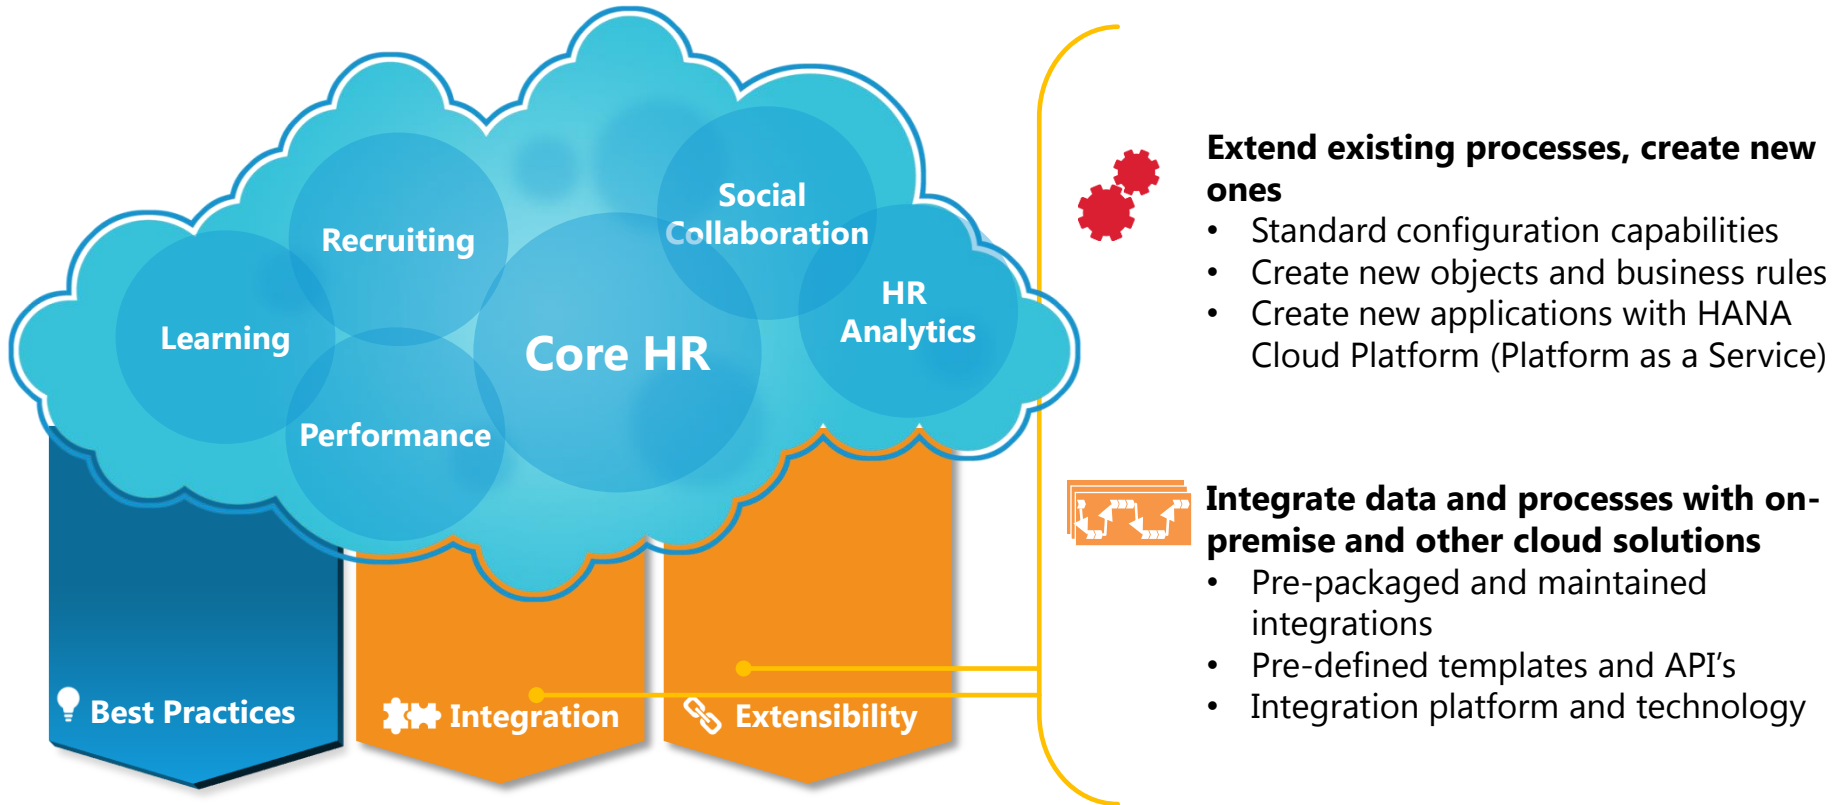

Develop new generation applications and extension scenarios

Looking for easy to use access and personalized solutions with state-of-the-art user experience

Looking for a robust platform with easy and intuitive tools and frameworks to drive innovation with efficiencies

SuccessFactors HCM Extensibility and Integration

By Hana Cloud Platform

SuccessFactors extension package

Is this an application or a software?

Nope, it's just a package name that consists of two main components, Metadata Framework (MDF) and the SAP HANA Cloud Platform. Both complement each other.

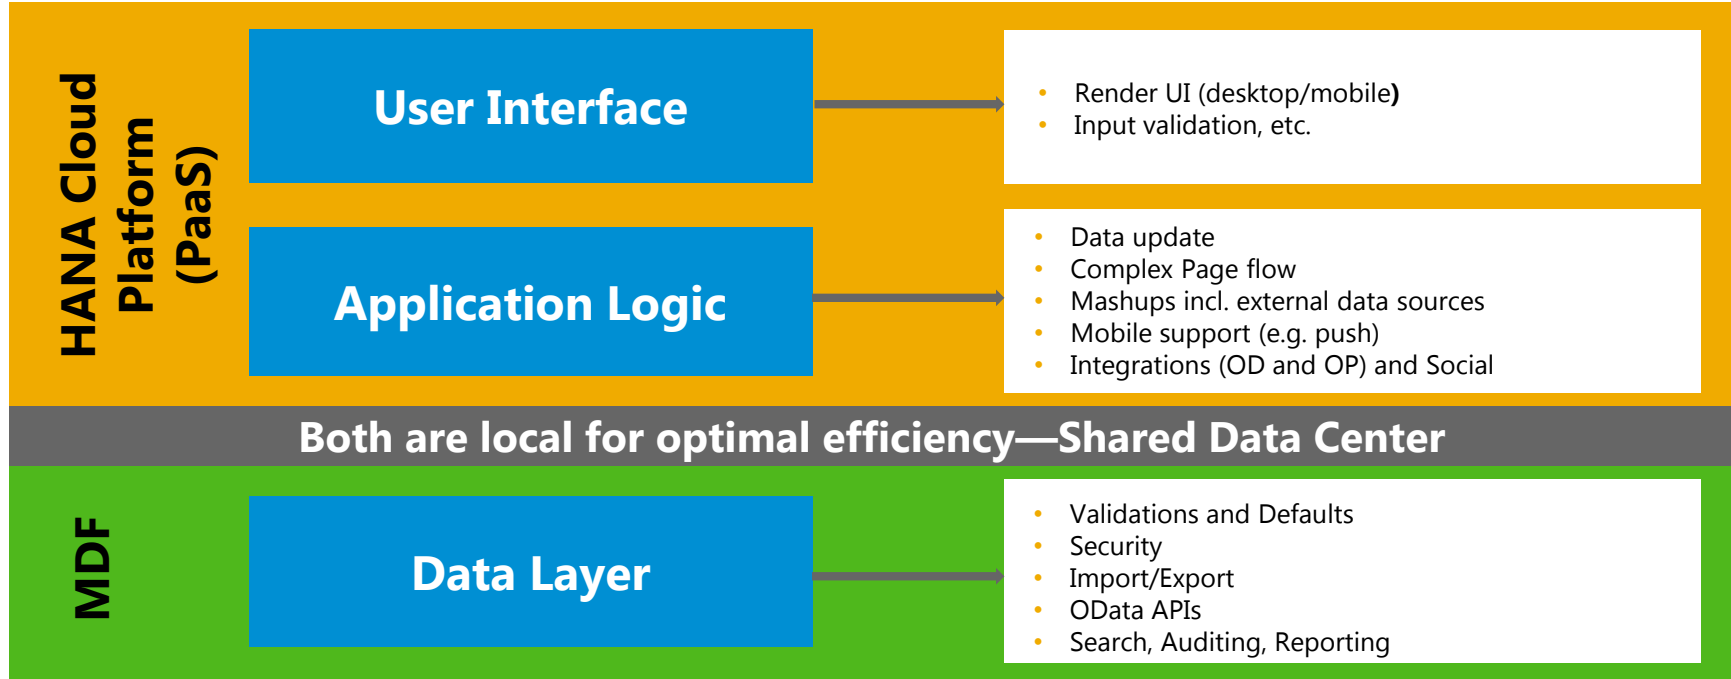

Why use it:

- ✓ IT can extend / create apps in the cloud
- ✓ Business users can easily extend SuccessFactors applications
- ✓ Extensions work with the existing applications ecosystem

Application Flexibility and agility

Flexibility and isolation of a standards-based cloud platform-as-a-service

Speed and simplicity of data modeling in MDF

SAP common cloud platform

Harmonized navigation and Portal runtime for Extension Apps

Develop extension apps using out-of-the-box services for SSO, Theming, Data Access (MDF), Storage, Tooling, Mobile support, etc.

The screenshot displays the SAP SuccessFactors user interface. A navigation menu is open, showing options like Home, Jam, Goals, Performance, Calibration, Compensation, Development, Careers, Succession, Recruiting, Time and Attendance, Company Info, Employee Files, Analytics, Planning, Admin Tools, and Networking Lunch. The main dashboard includes sections for 'Possible Networking Lunches' (featuring John Groce), 'My Team' (with a 'Sales Director' role), 'My Info' (showing Carla Grant's profile), 'Analytics' (displaying a 'Voluntary Termination Rate' of 14.2), and 'Jam' (promoting the use of Jam).
