New Opportunity for Financial Excellence

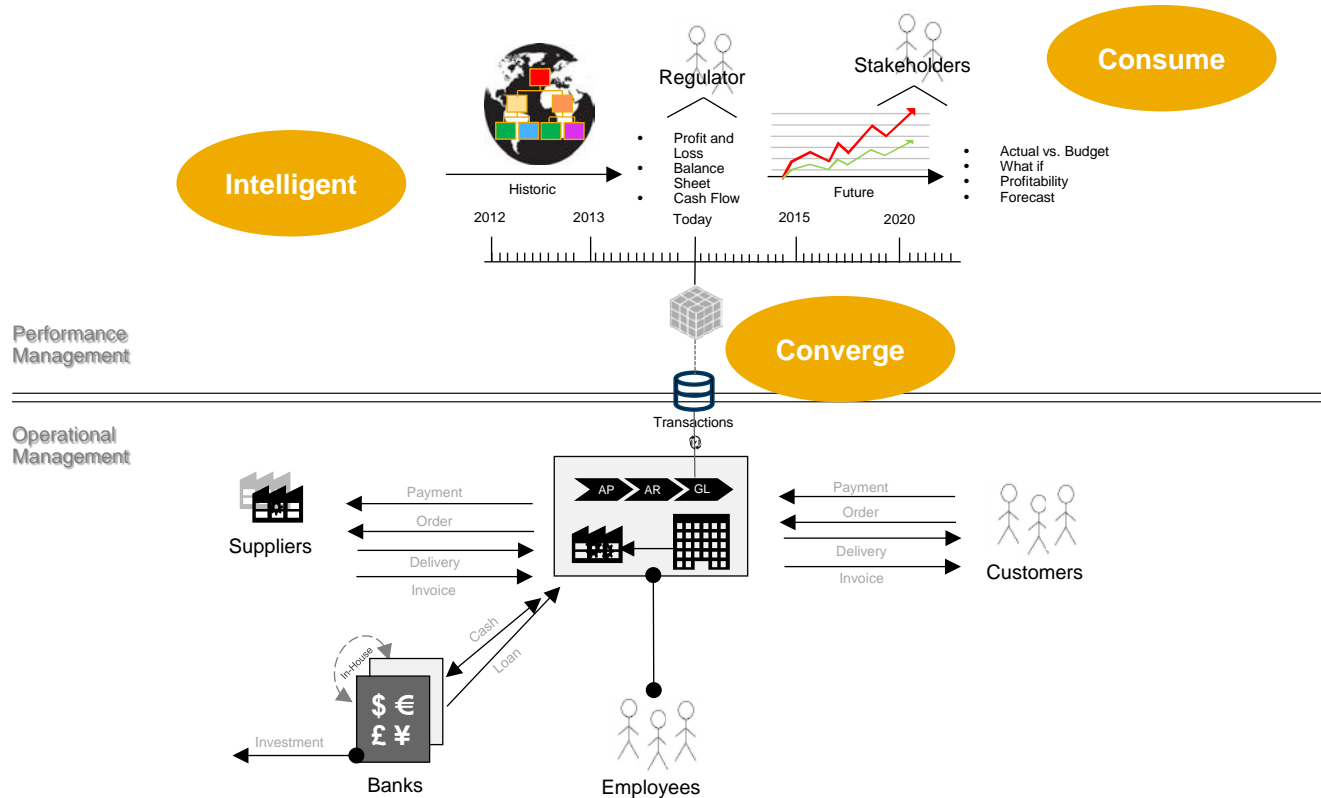

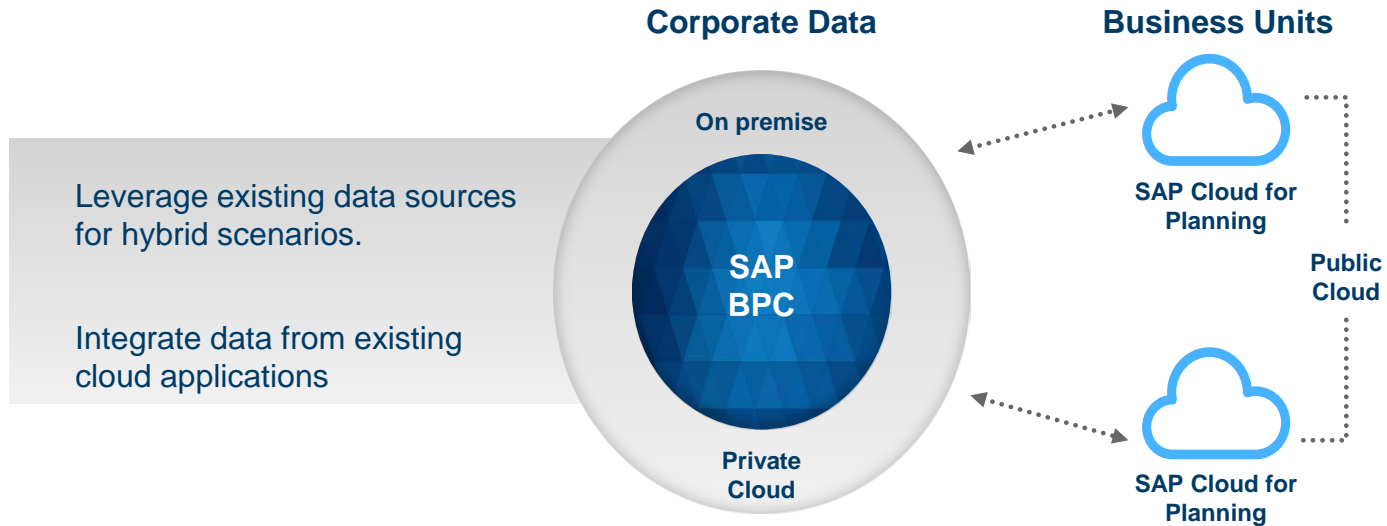

- ✓ Agility is an increasingly important source of competitive advantage.
- ✓ IT systems for FP&A are falling short of intensifying demands for real-time, ad-hoc analysis.
- ✓ Tight integration between financial planning systems and core ERP supports more effective decision making.
- ✓ Pressure on finance teams to improve their contribution to high-value planning and analysis is increasing.

FP&A may be
the most important skill set
for finance leaders

The major trends in FP&A Technology

SAP now Offer Best of all Worlds

Requirements for Corporate Financial Planning

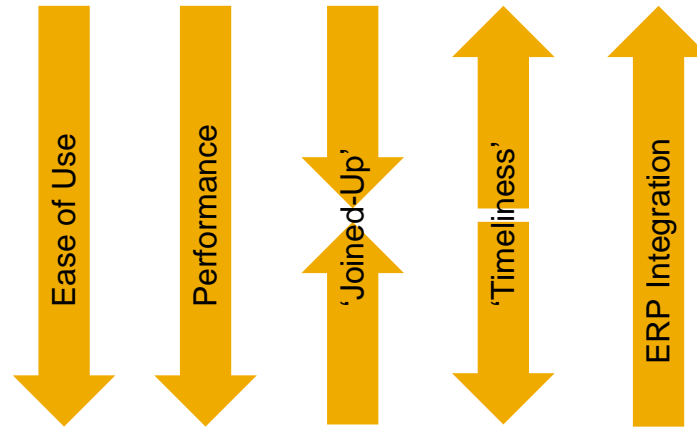

Planning needs to be 'Joined Up' – and based on Actuals information

Three fundamental approaches:

plan in the ERP

plan in a Data Warehouse

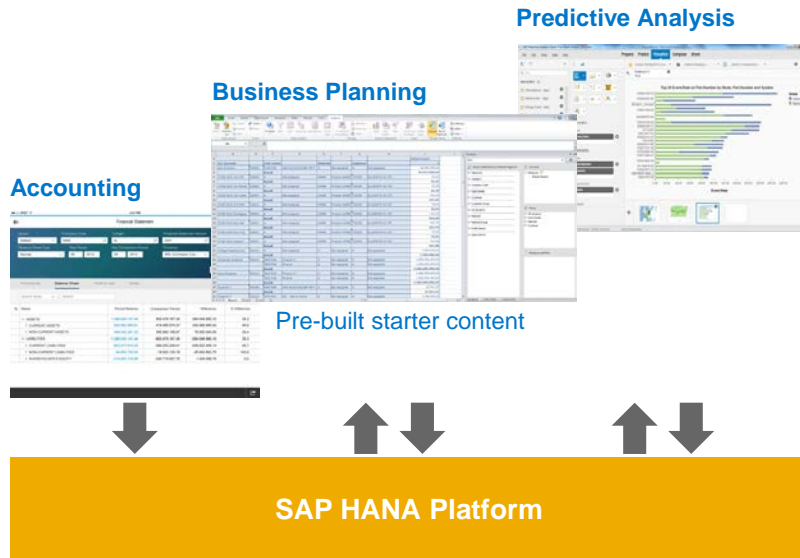

plan using Data-marts

Next Generation ERP Business Planning

SAP BPC optimized for S/4HANA

“Convergence of SAP ERP and SAP Business Planning (BPC)”

Key capabilities

Single planning solution with strengths of current solutions

Real-time access to master and transactional data for modeling and variance analysis

Flexible drill-down on drivers of profitability including customer, product, geography and channel

Identification of trends and forecasts using predictive analysis

Seamless integration of planning screens into ERP workflows

End-to-end simulation capabilities

Pre-built planning models for accelerated adoption

New Approach to ERP Planning

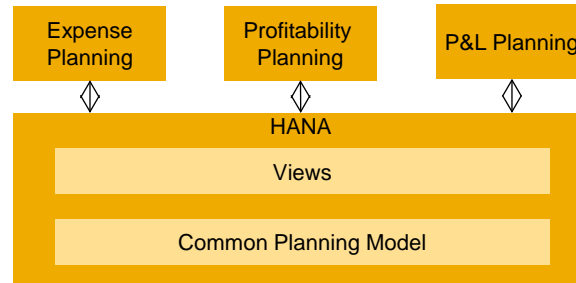

Before in ECC

- Planning silos with separate data stores
- Long running batch jobs
- Peer-to-peer transfer programs
- Cumbersome process
- Many manual steps – fault prone
- Simulation impossible

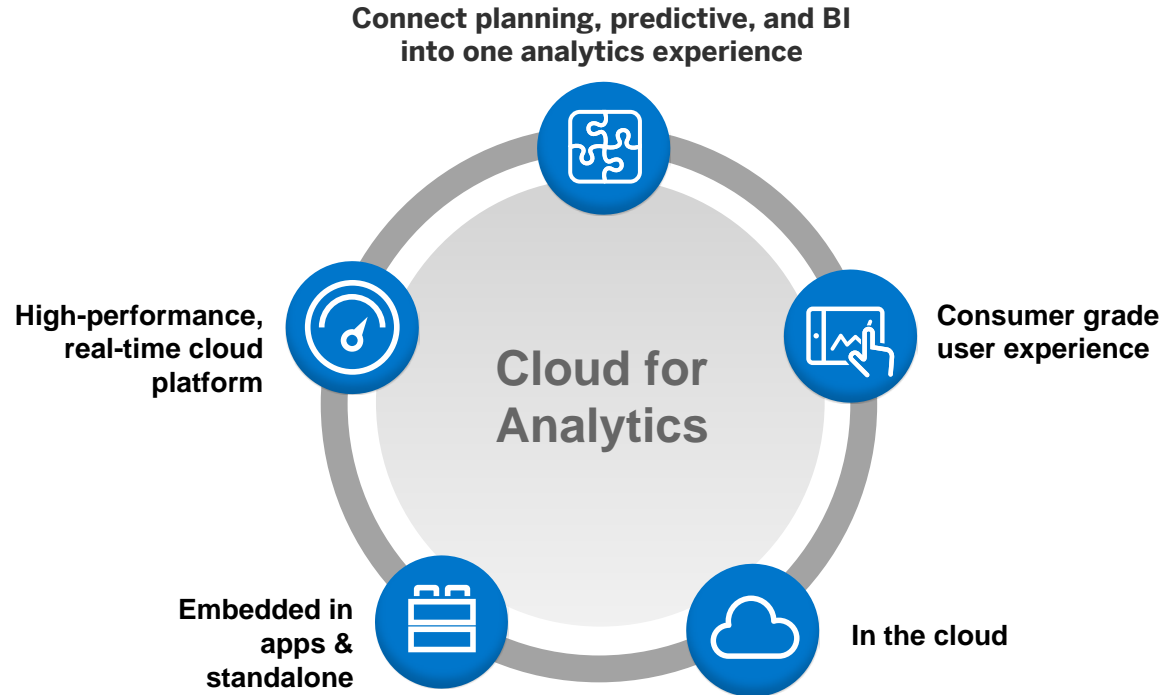

S/4 HANA Business Planning

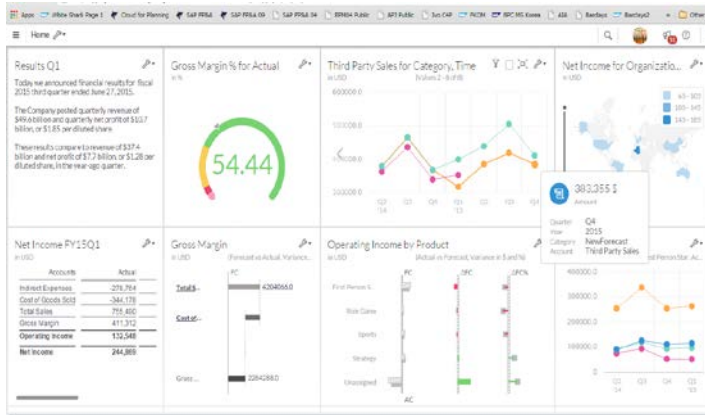

- Common Financial Planning model
- Leverage In-Memory-planning capabilities
- Faster planning cycles
- Better decisions through end-to-end simulation capabilities

SAP's Vision For Analytics in the Cloud

SAP Cloud for Analytics with Planning

1. Brand new, built for SaaS
2. Planning and Analytics
3. Start with Finance (FP&A)

Plan Simpler.

People-centric

Analytics-embedded

Future Oriented

Deep dive in the planning solutions

Jean-Claude Pizzi

EPM and Finance Business Development, SAP EMEA

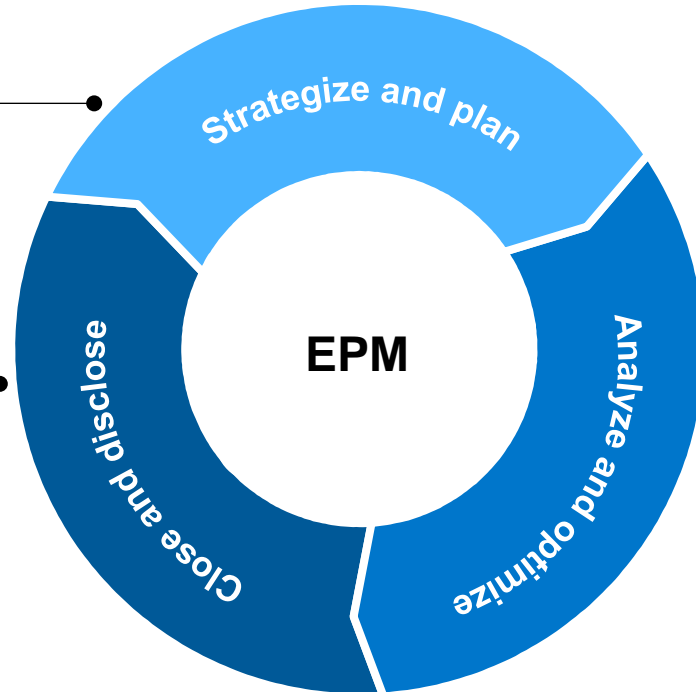

Our solutions for EPM and Planning

Strategize and plan

- SAP Strategy Management application
- SAP Business Planning and Consolidation application
- SAP Cloud for Planning solution

Close and disclose

- SAP Intercompany application
- SAP Business Planning and Consolidation
- SAP Financial Consolidation application
- SAP Disclosure Management application

Analyze and optimize

- SAP Cloud for Planning
- SAP Business Planning and Consolidation
- SAP Profitability and Cost Management application
- SAP BusinessObjects business intelligence solutions

Our focus

Lead

Lead the market with continuous investment in SAP solutions for EPM 10.X

Integrate

Incorporate SAP BW integrated planning capabilities into SAP Business Planning and Consolidation, version for SAP NetWeaver

Innovate

Innovate with new EPM capabilities built natively on SAP HANA Cloud Platform

Future direction

SAP Analytics strategy

Provide new SaaS Analytics capabilities

SAP Cloud for Analytics

All analytics capabilities in one product

Consumer-grade user experience

Embedded and standalone

High-performance, real-time platform

Software-as-a-Service in the Public Cloud

Continued investment in existing solutions

Enterprise BI
SAP BusinessObjects
BI Suite

BI 4.2 (Q4)
Design Studio 1.6 (Q4)
Analysis Office 2.2 (Q4)

Agile Visualization
SAP Lumira

Lumira 1.29 (Q4)

Advanced Analytics

SAP Predictive Analysis

Predictive Analysis 2.4 (Q4)

EPM
Ex. SAP Business Planning and Consolidation (BPC)

BPC 10.1 NW SP08 (Q4)

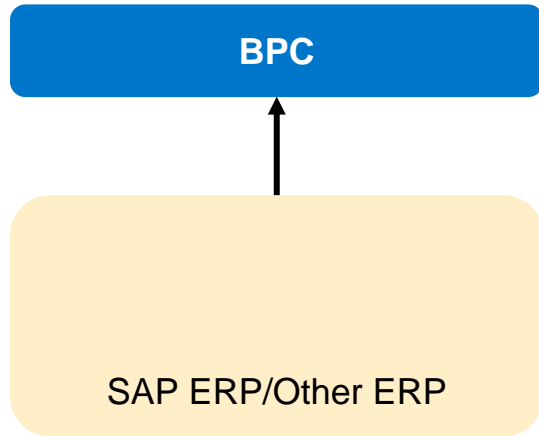

GRC
Ex. SAP Risk Management

Risk Management 10.1 SP11 (Q4)

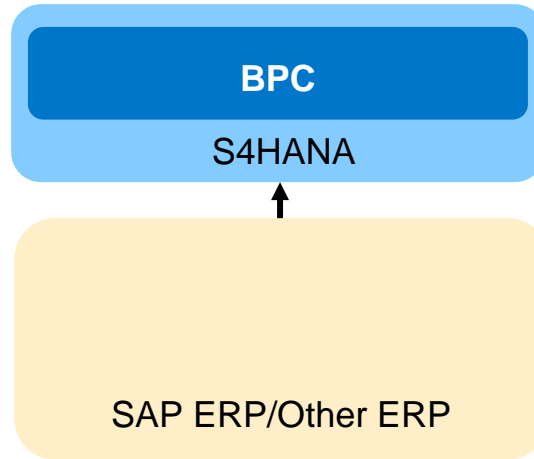

On-premise and/or Private Cloud Deployment Options

Very flexible BPC Deployment Options

“Stand-Alone”

“Central Finance”

“Fully Integrated”

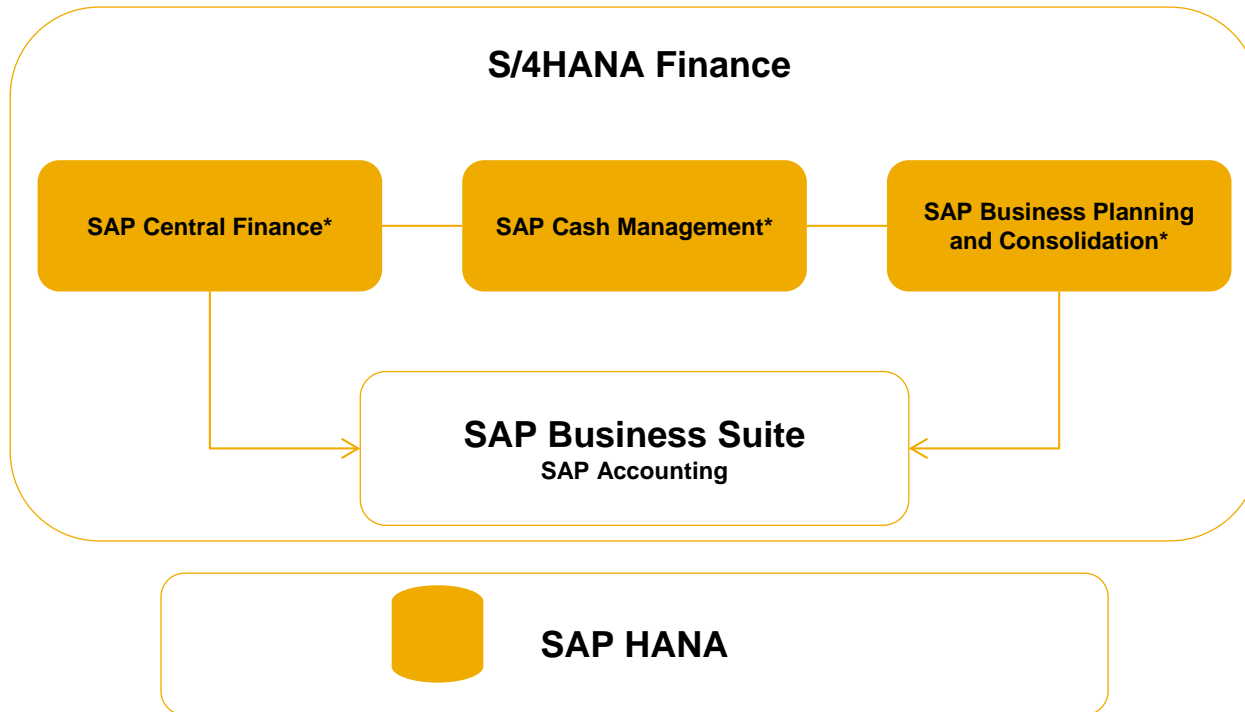

SAP BPC optimized for S/4HANA

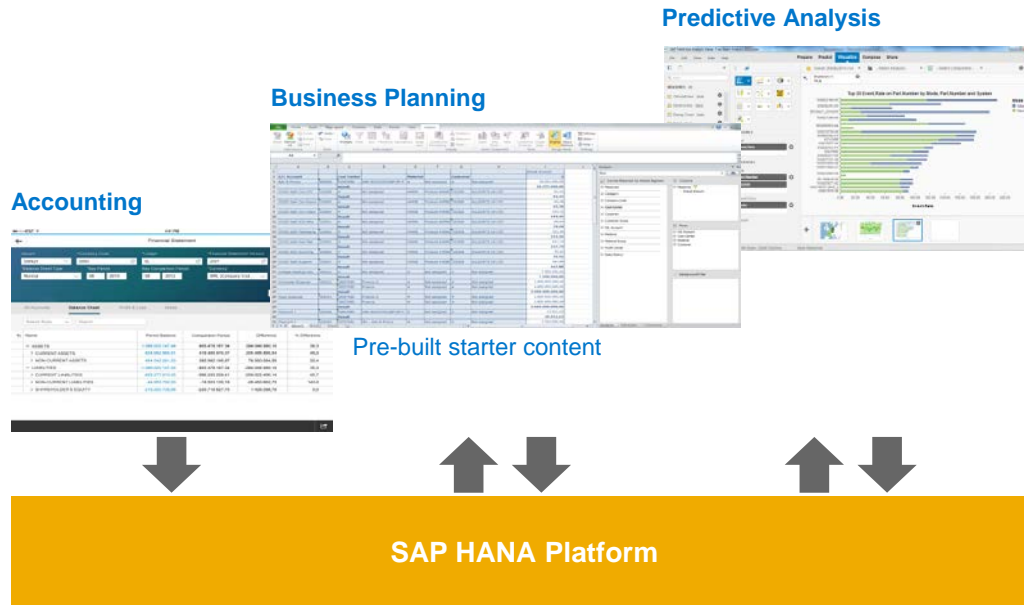

S/4HANA Finance

(*) Requires separate license

Next Generation ERP Business Planning

“Convergence of SAP ERP and SAP Business Planning (BPC)”

Key capabilities

- Single planning solution with strengths of current solutions
- Real-time access to master and transactional data for modeling and variance analysis
- Flexible drill-down on drivers of profitability including customer, product, geography and channel
- Identification of trends and forecasts using predictive analysis
- Seamless integration of planning screens into ERP workflows
- End-to-end simulation capabilities
- Pre-built planning models for accelerated adoption

S/4 HANA Finance – BPC 10.1 Templates*

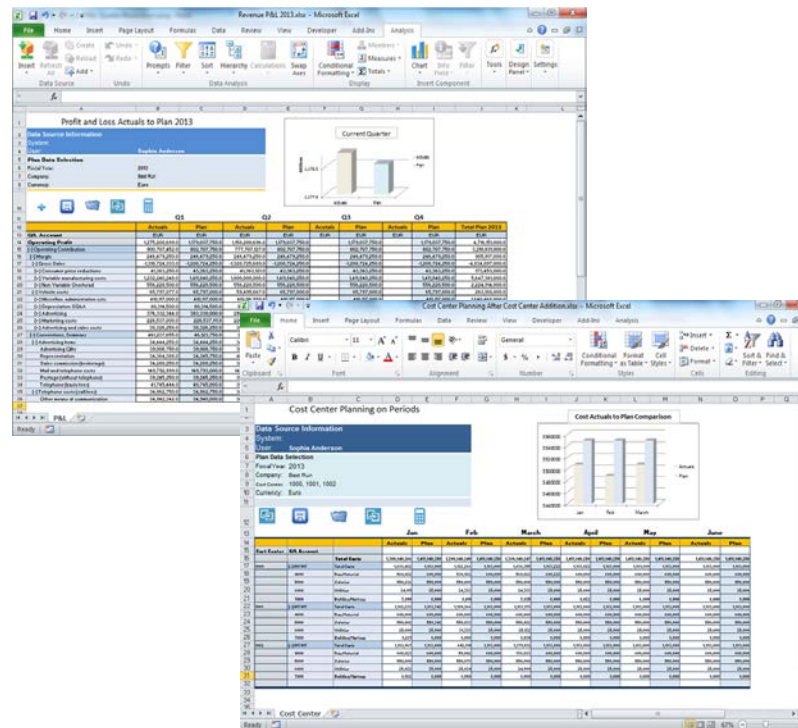

S/4 HANA Finance includes templates that provide support for:

- Cost Center Planning
- Internal Order Planning
- Project Planning
- Profit Center Planning
- Cost of Sales Planning
- P&L Planning
- Market Segment Planning
- Balance Sheet (SFIN 2.0)

S/4 HANA Finance also includes:

- Queries
- Planning Functions
- Sequences

(*Previously known as Integrated Business Planning for Finance)

New Approach to ERP Planning

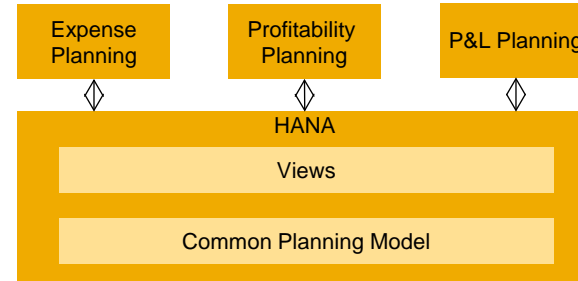

Before in ECC

- Planning silos with separate data stores
- Long running batch jobs
- Peer-to-peer transfer programs
- Cumbersome process
- Many manual steps – fault prone
- Simulation impossible

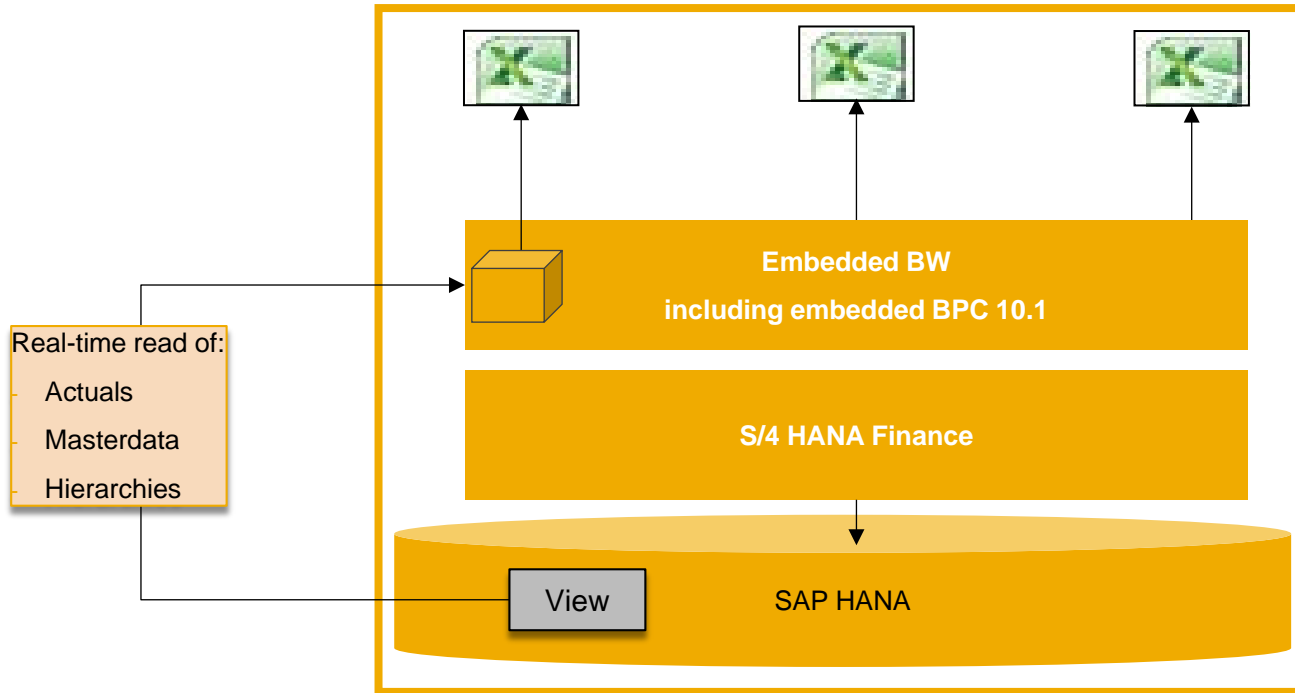

S/4 HANA Business Planning

- Common Financial Planning model
- Leverage In-Memory-planning capabilities
- Faster planning cycles
- Better decisions through end-to-end simulation capabilities

Real Time Planning Architecture

The 7 key benefits

- **Incorporate real-time actuals** – ability to compare plan/forecast against up to date actuals – including commitments.... Better budget management – avoid unforeseen overspends. Deliver real-time Liquidity Planning.
- **Dynamic forecasting with real-time ERP data** helps eliminate bad practices around budget manipulation (e.g. accrue against budget)
- **Method alignment** – allocation of costs - ‘distribution and assessments’ – built in to the ERP (for actuals) can be used for plan, budget & forecast – no need to rebuild/maintain in a separate planning tool – more accuracy, fewer disputes and all with less effort
- **Master data maintenance** – eliminate duplication of effort and potential errors & delays arising from mistakes
- **Best of all planning approaches** – single user license gives access to embedded planning plus ‘stand-alone’ (data-mart) architecture for maximum flexibility
- **Enterprise data model supports integration of financial and non-financial planning** – i.e. combination of industry planning (IS Retail, APO etc) with financial planning
- **Standardise reporting of actuals/budgets/plans and forecasts on one user interface – SAP Fiori**

SAP IBP for Finance - Actual & Planning 2014

Trust

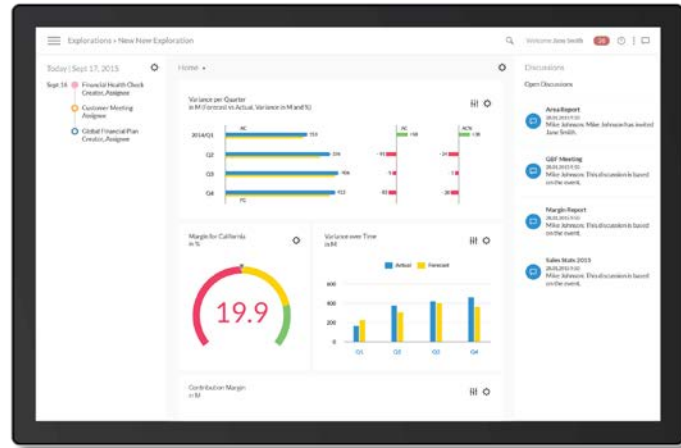

Simplify your job

- **All analytics in one product**
- **All business questions**
- **All data**

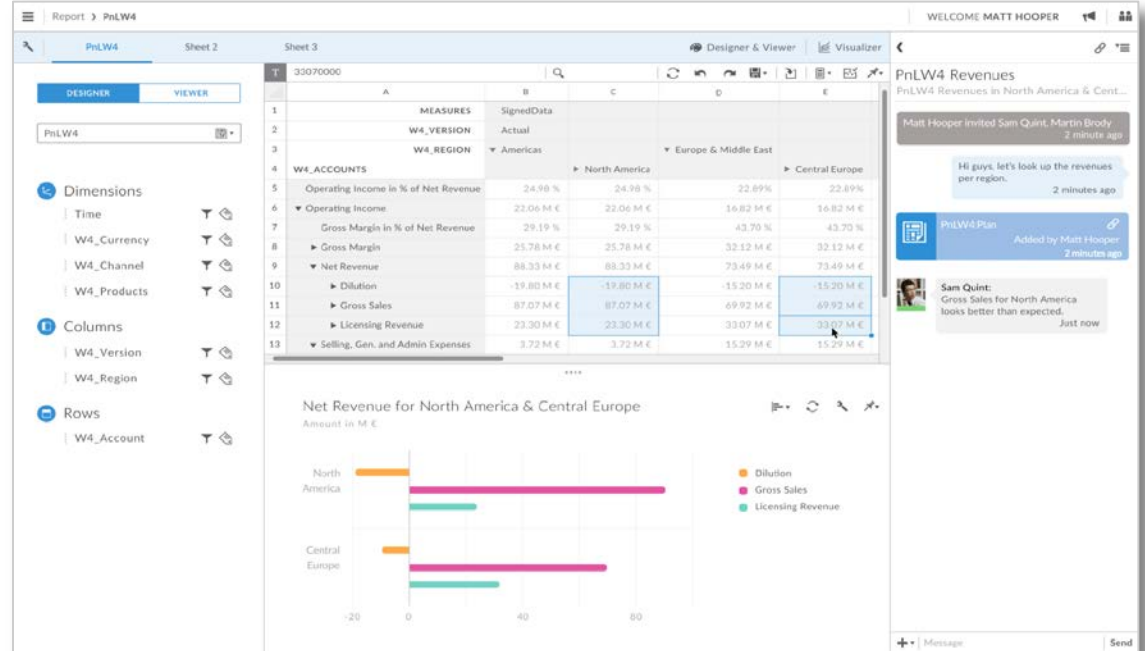

Experience a new product design

- People-centric design
- Agile analytics
- Embedded insights

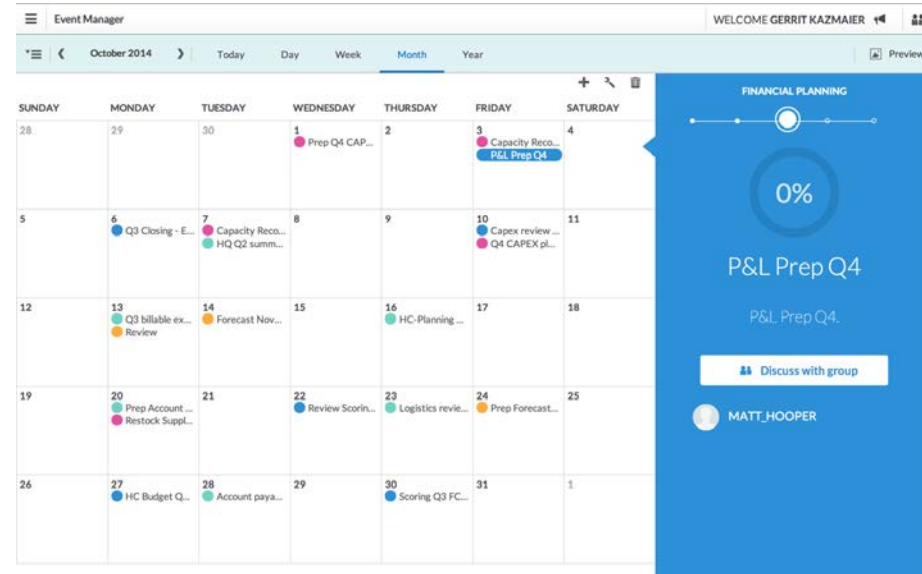

SAP Cloud for Analytics for Planning Plan Simplifier.

- Future-oriented
- People-centric
- Analytics-embedded

Future-oriented

- Enjoy a new generation of planning in the cloud with a modern look and feel
- Plan and simulate at any level of detail, with any number of users, at any time
- Trust your application will perform when and how you expect

People-centric

- Simply create and modify planning models on the fly
- Take action anytime, anywhere on the desktop or on the go
- Align plans across Finance and business units with direct integration into SAP Business Planning and Consolidation

The screenshot displays the SAP Business Planning and Consolidation (BPC) interface. The main window shows a financial report titled 'IncomeReport' with columns for 'Version', 'Actual', and 'Forecast'. The data is organized by 'Account' and includes various financial metrics such as 'Income Statement', 'Cost of Goods Sold', 'Net Revenue', 'General and Administrative Expenses', 'Taxes', 'Gross Margin %', 'MyMargin', and 'Operating Profit %'. The report is signed by 'Gerrit Kazmaier' and is in the 'Designer and Viewer' mode.

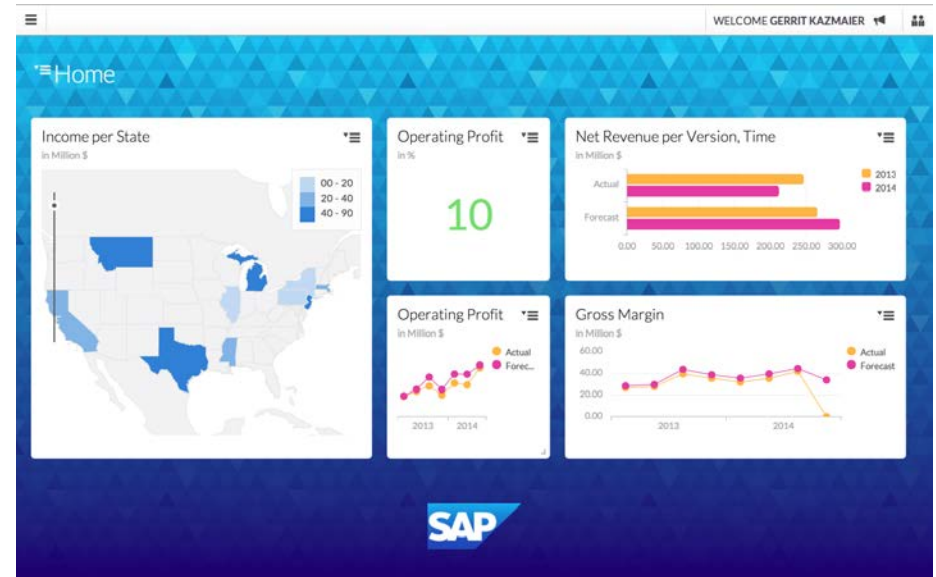

Overlaid on the right side of the interface is a chat window titled 'Rehearsal1IncomeReport'. The chat history shows a conversation between Gerrit Kazmaier and Martin Brody. The messages are as follows:

- Gerrit Kazmaier: Hi Martin, Matt
- Martin Brody: let me check
- Gerrit Kazmaier: I think we can update the forecast
- Martin Brody: what do you suggest?
- Gerrit Kazmaier: let me share my version with you
- Martin Brody: looks good!

The chat window also shows a notification: 'Gerrit Kazmaier has invited Martin Brody, Matt Hooper.' and a button to 'View of IncomeReport.Read only'.

Analytics-embedded

- Analyze and plan in the same app
- Personalize your KPIs and dashboard
- Collaborate in-context of your plan
