

Big Data and The Future of Cancer Care

Kevin Fitzpatrick
CEO
CancerLinQ

Origins of CancerLinQ:

“We seek the development of a *learning health system* in which science, informatics, incentives, and culture are aligned for continuous improvement and innovation – with best practices seamlessly embedded in the delivery process and *new knowledge captured as an integral by-product of the delivery experience.*”

INSTITUTE OF MEDICINE
OF THE NATIONAL ACADEMIES

The Challenges

1. To learn from every patient
2. To harness data in powerful new ways

Lung cancer: from one cancer to many

One disease

7 molecular drivers—and more to be discovered

- KRAS
- EGFR
- BRAF
- PIK3CA
- AKT1
- HER2
- EML4-ALK
- Unknown

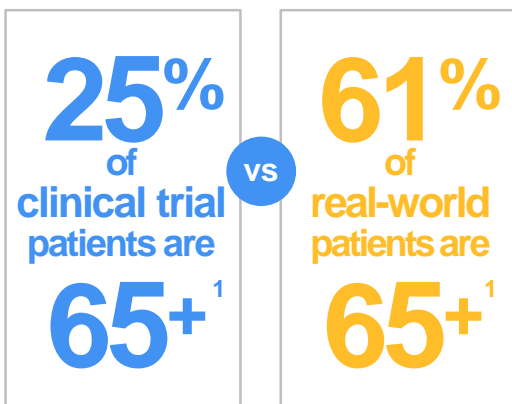

1.7^{MM}
people diagnosed with
cancer in the US

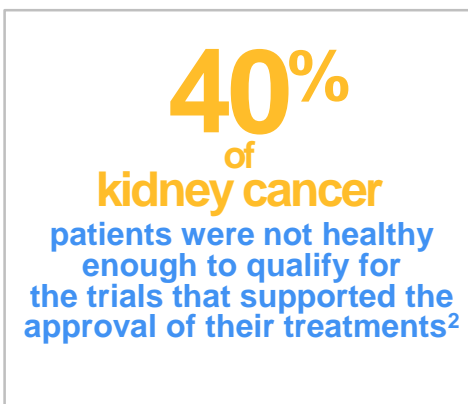

Only **3%** enroll in
clinical trials.

... and everyday patients tend to be ...

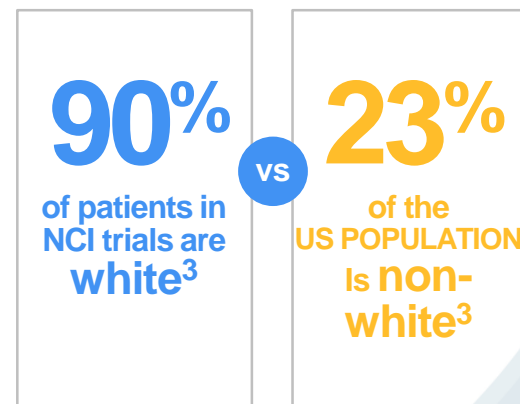

older...

less healthy...

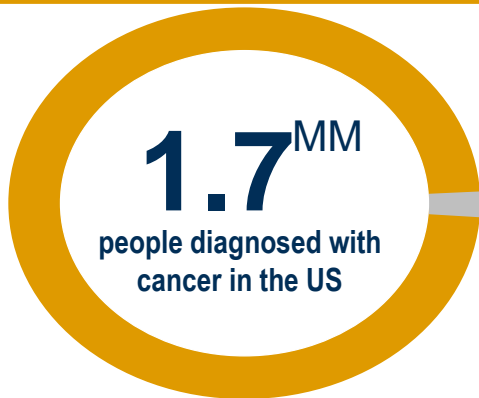

and more diverse...

...than clinical trial patients.

Real-Time Quality Measurement & Improvement

When Fully Deployed CancerLinQ Will:

Unlock, assemble, and analyze de-identified cancer patient medical records

Allow doctors to compare their care against guidelines and the care of their peers

Uncover patterns that can improve patient care

Provide guidance by identifying the best evidence-based course of care
