AIR & SEA BY NORBERT DENTRESSANGLE

A significant player in the global freight forwarding market

- **€220m** pro-forma revenue
- **720** employees
- **56** offices
- **14** countries on **3** continents
- Strong position on the Americas-Europe-Asia axis and in the Russian market
- Member of WACO, ALN and EURTEAM networks

CONTEXT

Multi TMS

- ✓ Multi Database
- ✓ Several EDI Platforms
- ✓ Multi Datacenter
- ✓ Consolidation effort
- ✓ No standardization
- ✓ ERP interface for each TMS
- ✓ No customer visibility
- ✓ IT costs

STREAMLINING WITH SAP SOLUTIONS

Global Management

- ✓ Common DataBase
- ✓ Cover all compliances
- ✓ Languages & Currencies
- ✓ Operations standard
- ✓ Global Reporting & KPI's

Productivity Gain

- ✓ SAP ERP Integration
- ✓ Single input Export/Import
- ✓ End-to-End Visibility
- ✓ Planning & Optimizer
- ✓ IT Maintenance

PROJECT APPROACH

Organization

- ✓ Dedicated team
 - TM Project Manager
 - SD/MM Project Manager
 - FI/CO Project Manager

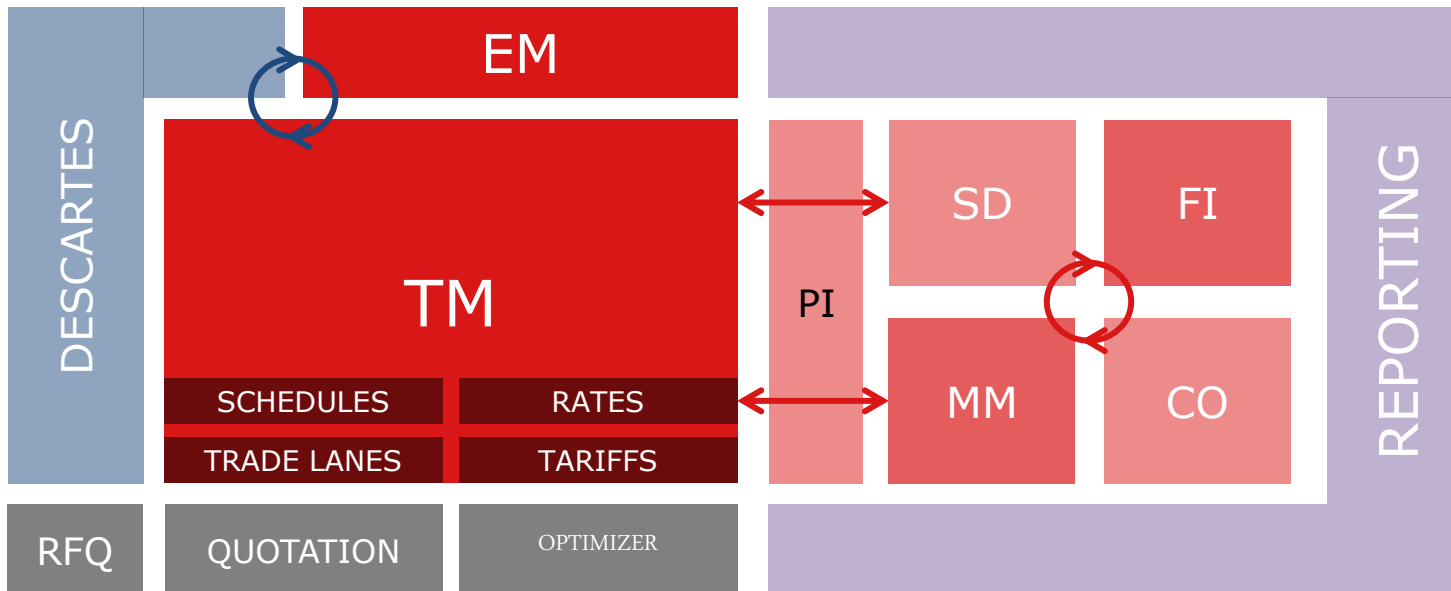

- ✓ TM/EM Consulting
 - logventus GmbH

Phases

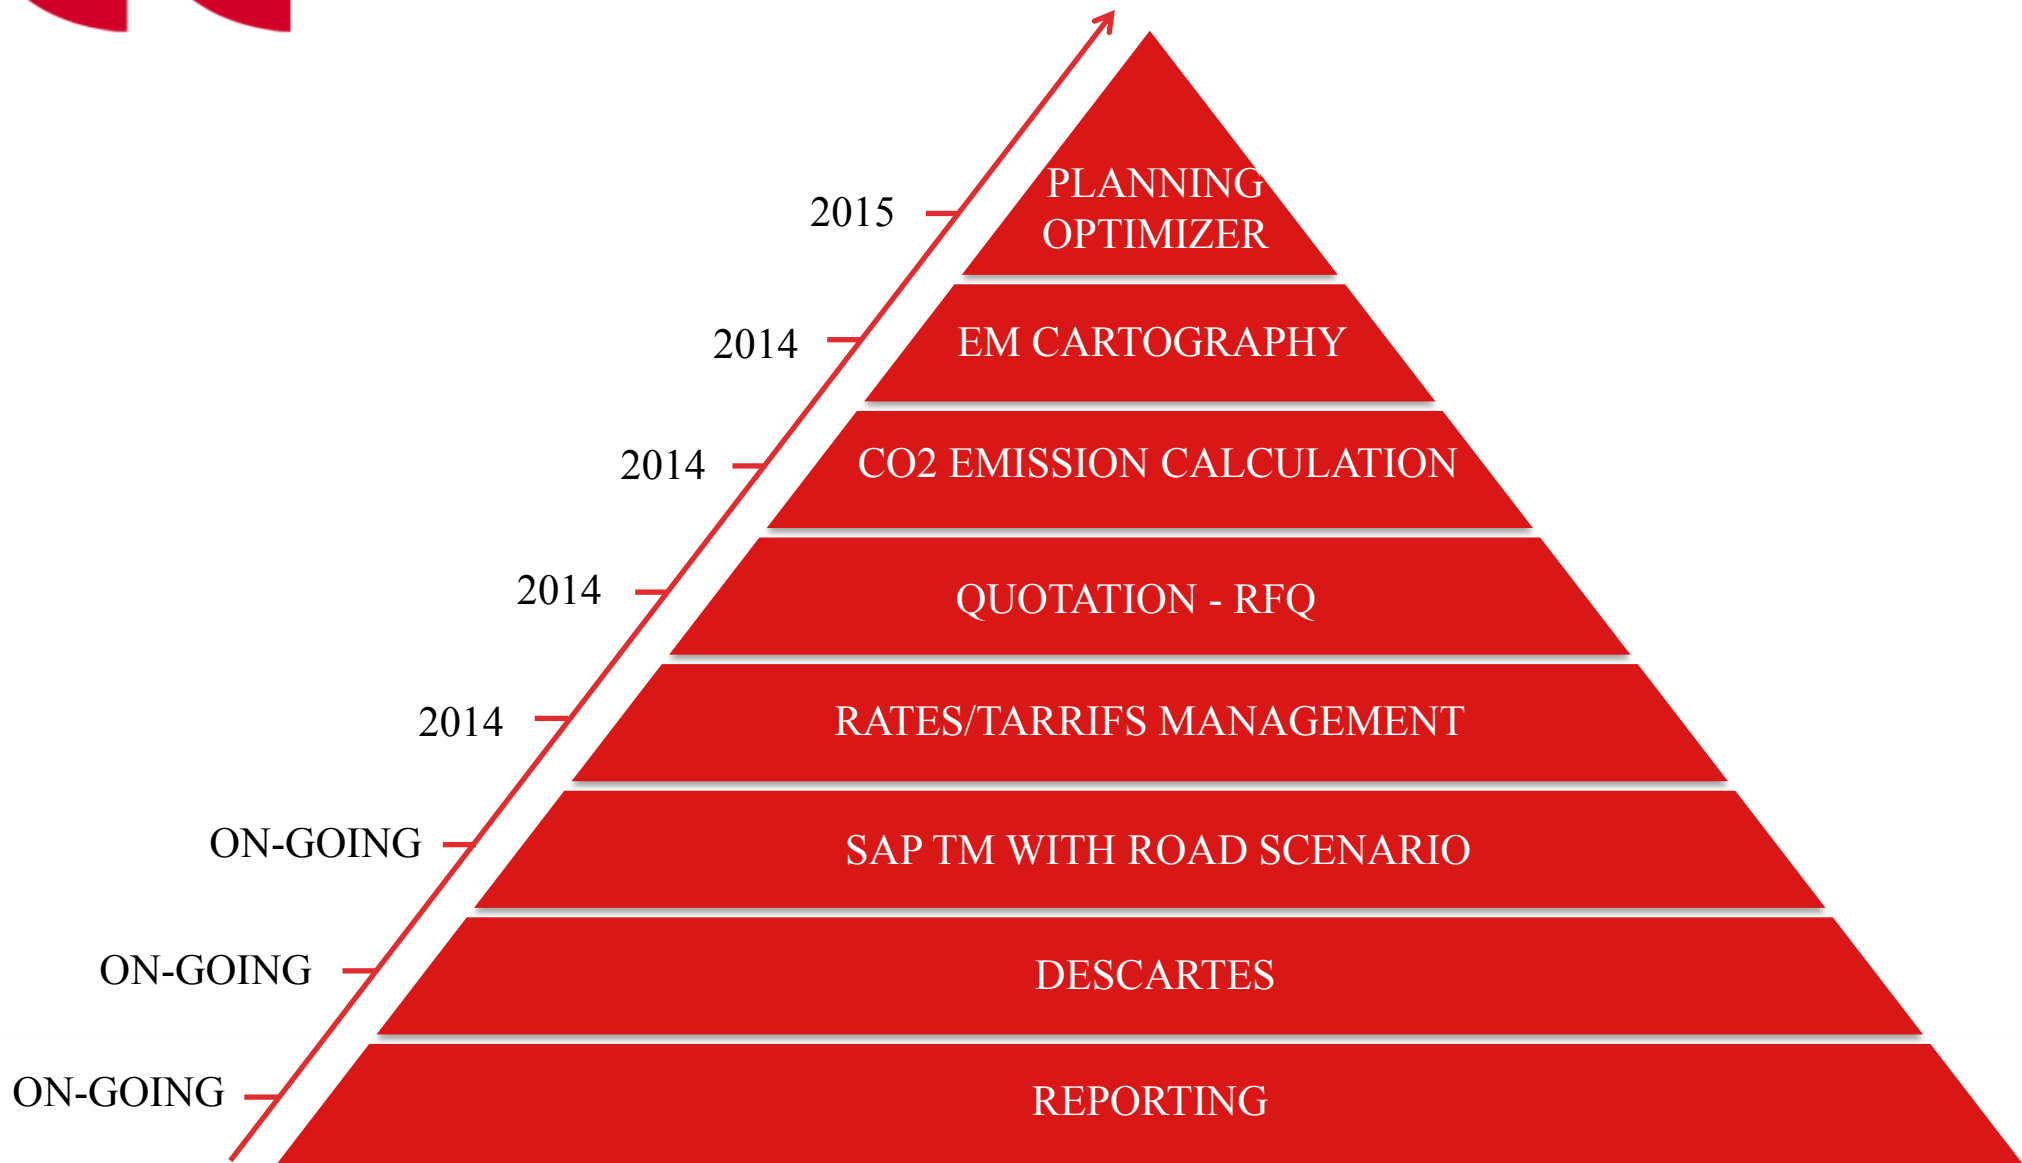

- ✓ Phase 1: **Pilot**
 - Belgium
 - Basic Core-Model
 - EM & ERP Integration

- ✓ Phase 2: **Roll-Out**
 - NL, HK, CN, US, ...
 - Phased-Development

SAP TM Approach

Michael Breusch, logventus GmbH

Nassim Teffah, Norbert Dentressangle Overseas

SAP TM at Norbert Dentressangle Overseas

■ Current Situation SAP TM 9.0

- Ocean Freight
- Air Freight
- CO₂ Calculation
- Track & Trace
- TM Reporting with BCV

■ Upgrade SAP TM 9.2

- Strategic Freight Management
- Collaboration Portal
- Asset Management

Door-to-door Transportation Solutions

SEA FREIGHT

- Integrated network: import & export / LCL & FCL
- Focused on key ocean trade lanes
- Consolidation centres in all major ports
- One single point of contact from collection to delivery

Door-to-door Transportation Solutions

AIR FREIGHT

- Integrated network: import & export / daily consolidation from major airports
- Focused on key air trade lanes
- One single point of contact from collection to delivery

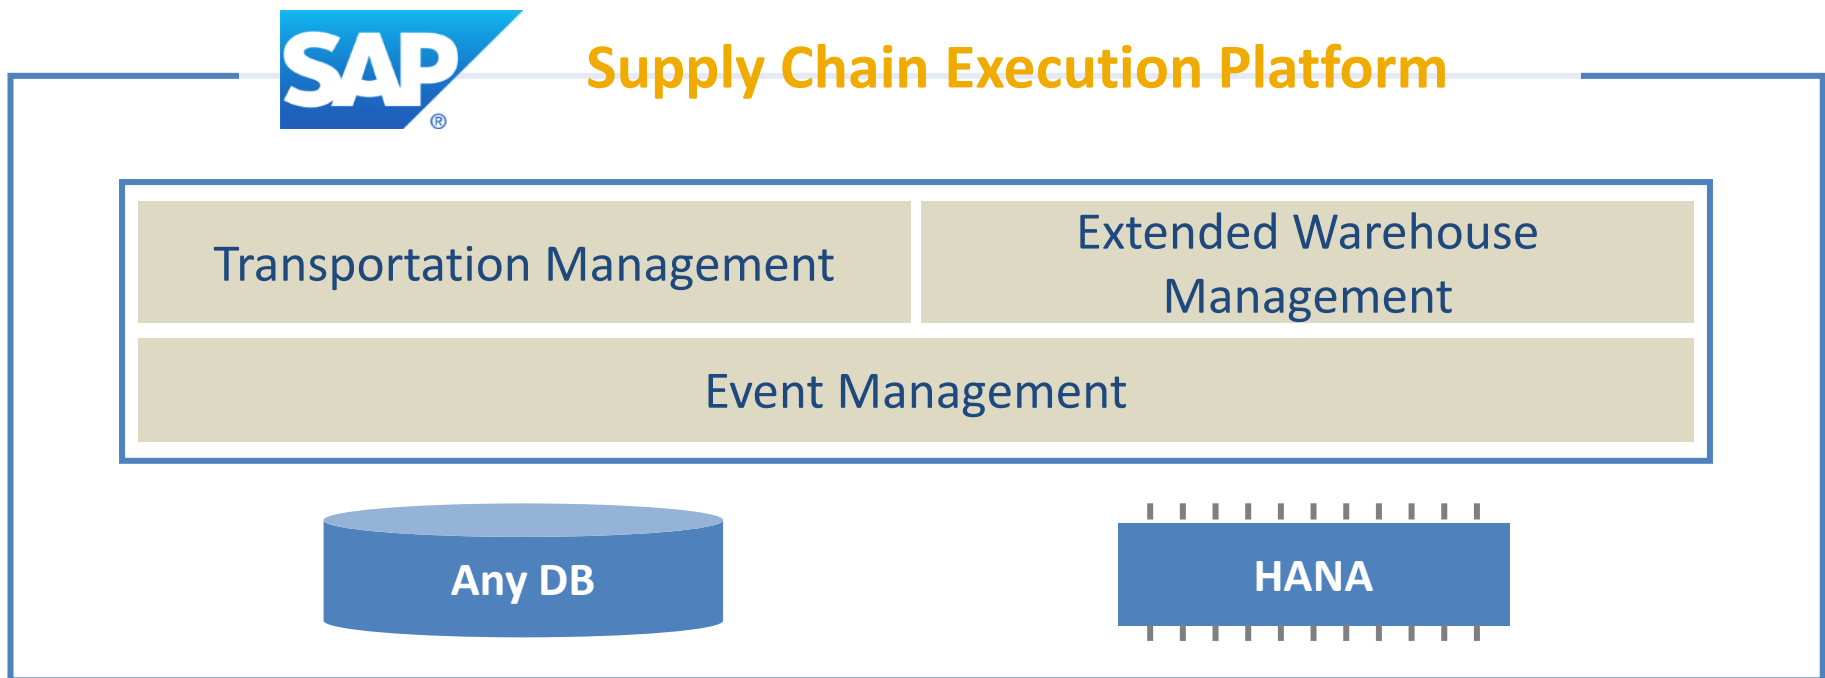

SAP World-Class Supply Chain Execution

Best-in-Class

Integrated

Connected

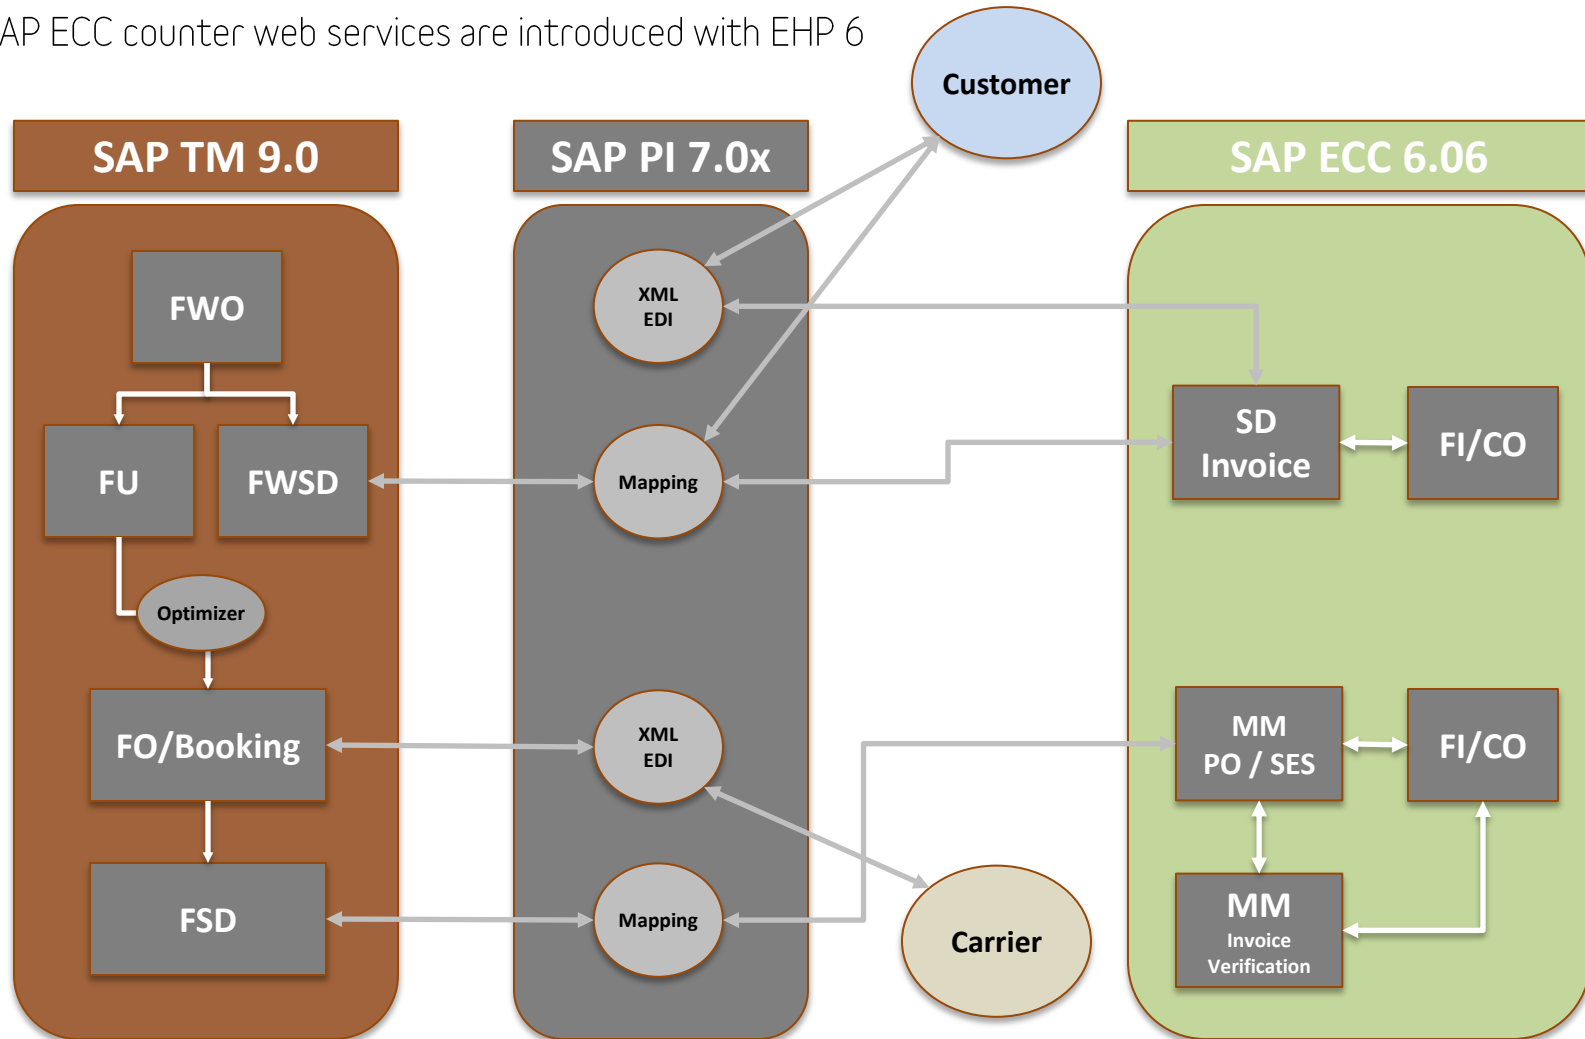

Real-Time

SAP TM Landscape considerations

Landscape Aspects TM 9.0

- SAP TM 9.0 standard communication web services („only“)
- SAP ECC counter web services are introduced with EHP 6

SAP ECC 6.06

- Enabling of standard ECC integration for Billing in SAP SD and FI-CO
- Enabling of standard ECC integration for Invoicing in SAP MM and Accruals in SAP FI-CO

SAP PI

- Integration of SAP ECC and SAP TM based on standard mapping content via SAP PI
- Minor enhancement of standard mapping content with additional fields (TBD), not structure of interfaces (hierarchy)

SAP TM 9.0

- End-to-End configuration and set-up of TM standard processes for Air and Ocean Freight Import/Export
- Master Data Integration from SAP ECC 6.06
- Set-Up of geographical Master Data Network (Lanes, Zone, Locations, Business Partners)
- Load Planning and Shipment Scheduling (incl. Multi-Mode)
- Carrier Selection & Business Share Management
- Shipment Execution in SAP TM
- Printing of Shipment forms and documents
- Integration to SAP EM for tracking purposes

EDI Mapping

- Mapping take place via SAP PI

SAP Business Warehouse

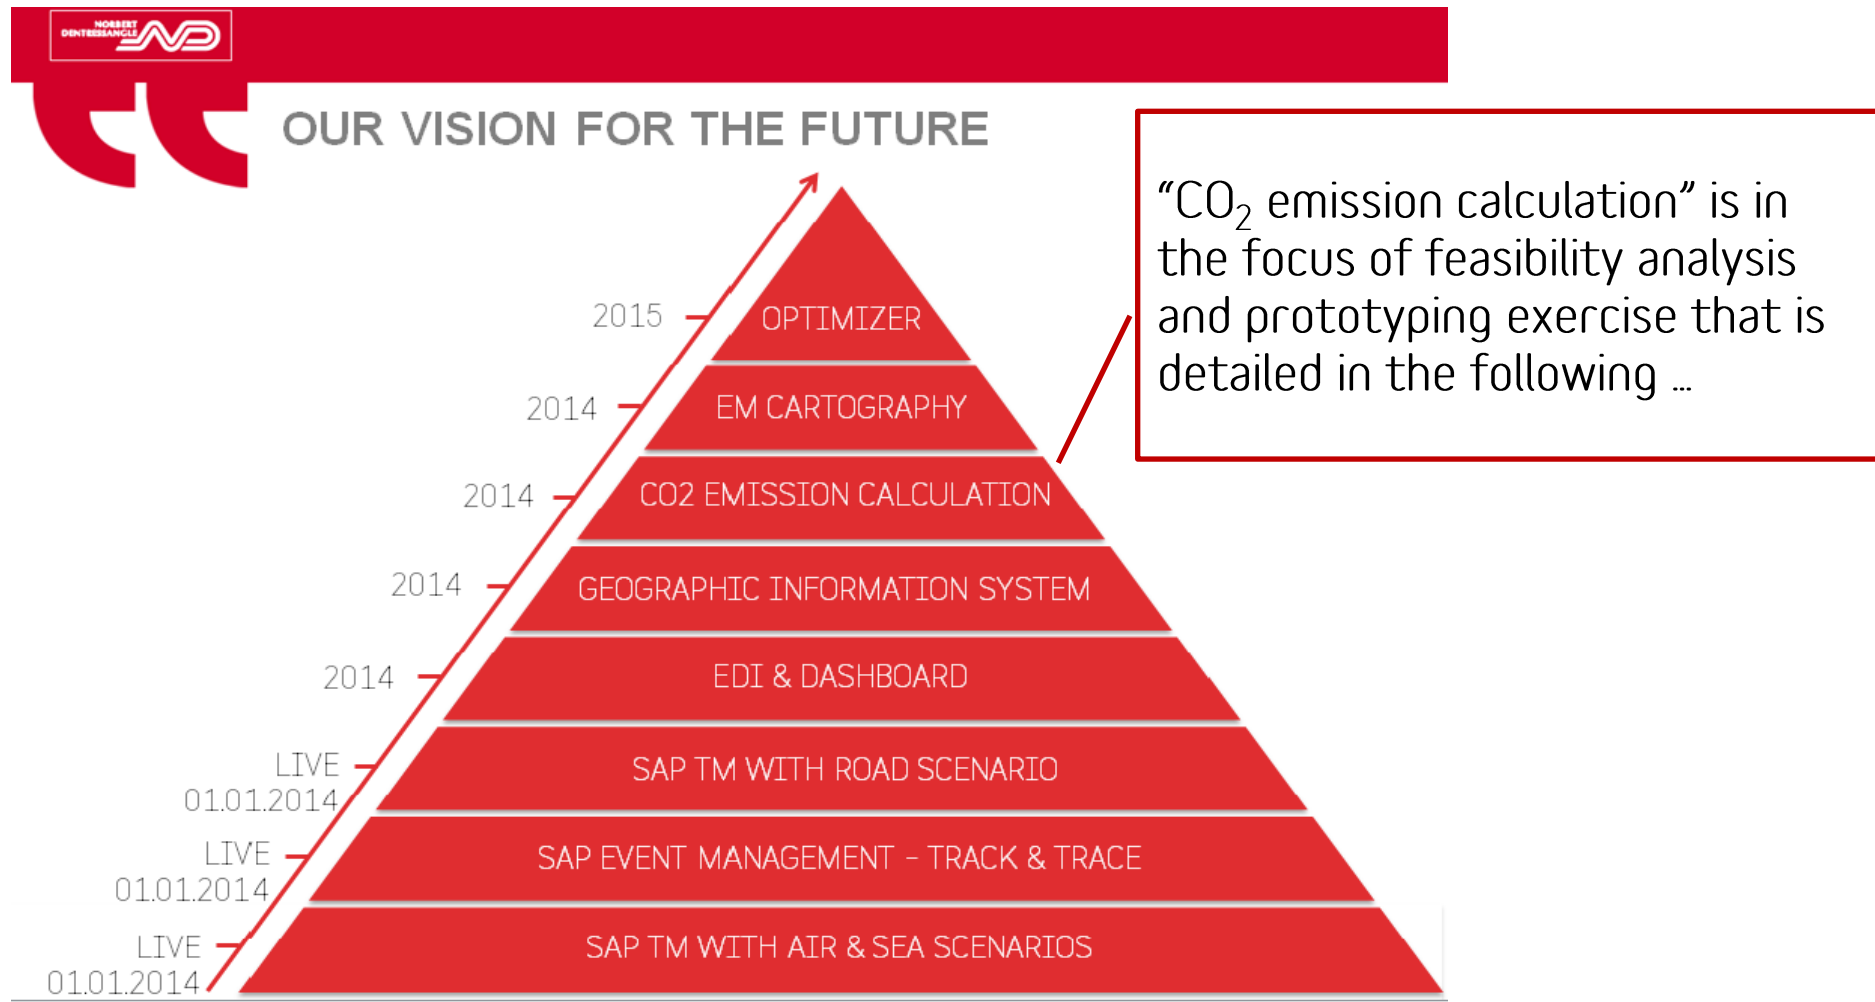

- Reporting within TM based on SAP BCV

SAP Event Management

- Enabling of transportation tracking scenarios based on standard TM-EM 9.0 visibility connectors
- Enabling of customer and carrier access for manual status display, update

CO₂ Emission Calculation at NDO

Norbert Dentressangle's vision is reflecting the legal requirements

CO₂ Calculation with SAP TM

Since **1st October 2013** French logistics service providers are obliged to determine and disclose CO₂ information for transport services due to **article L. 1431-3 of the French transport code**. The CO₂-information has to be shown at customer quotations and customer invoices.

Today, this CO₂-information calculation is done with third **party systems or web services** outside the transportation planning system (SAP TM). This requires **additional interfaces** to those CO₂-information service providers and **additional fees** for the calculation service.

The consulting solution of logventus GmbH offers the CO₂-information calculation **within SAP TM** using the existing master data and transportation planning data **without any additional interfaces and volume fees**. The CO₂-information will be calculated and stored inside the SAP TM system. Then it can be displayed in the quotation and invoice. Beyond this, the CO₂-information can also be used for post-analytics.

Legal Requirements

French logistics service providers are obliged to determine and disclose CO₂ information for transport services due to:

- Grenelle de l'Environnement - Its compulsory application was integrated into article L. 1431-3 of the French transport code -
- French decree No. 2011-1336 of 24 October 2011, specifies the terms and conditions for the implementation of article L. 1431-3 of the French transport code
- Since 1st of October 2013 the CO₂ information disclosure requirements became mandatory for shipments which depart from or arrive at France

French legislation requires LSPs to report more accurately, leveraging carrier specific data, starting 2016

Ex-Ante and Ex-Post CO₂ Emission

Article L. 1431-3 allows flexible arrangements for providing CO₂ emission data:

- Before planning (before means of transport is assigned)

- Ex-ante CO₂ emission estimated

- After planning (before transport has been executed)

- Ex-post CO₂ emission estimated

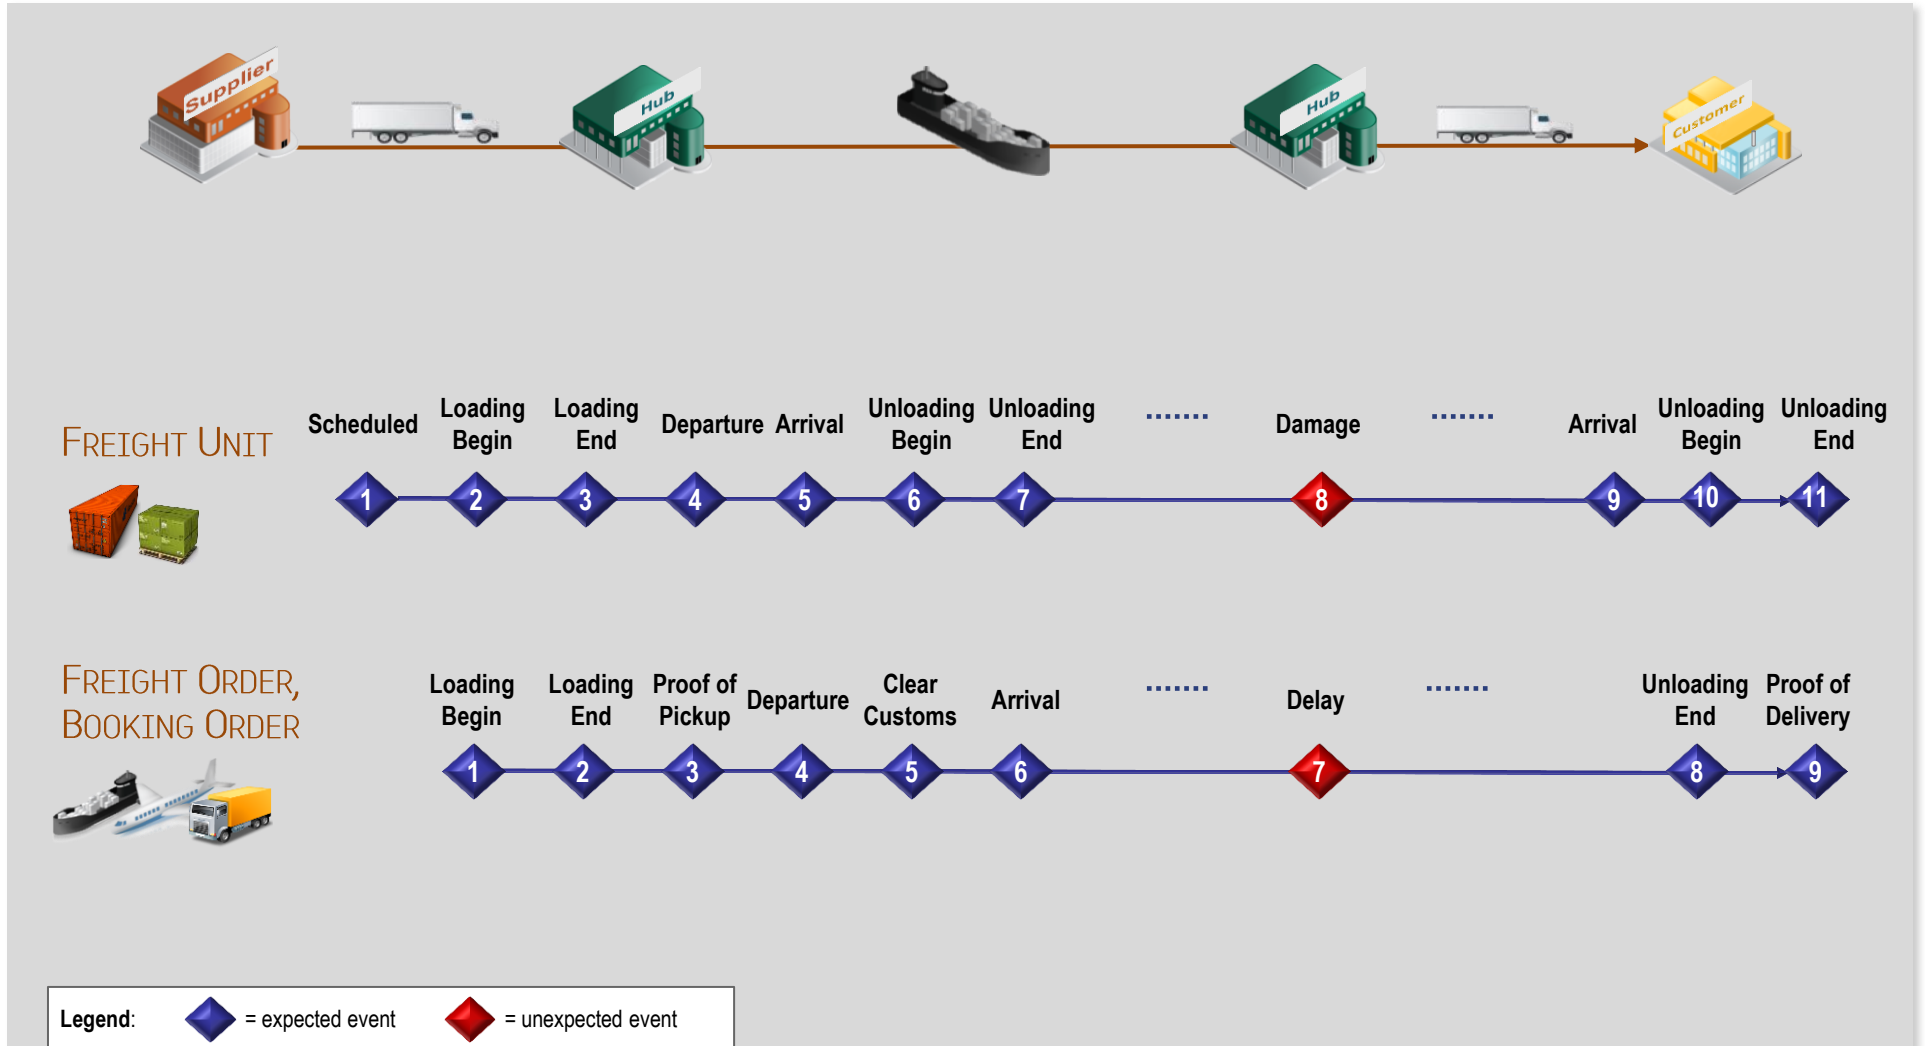

- After execution

- Ex-post CO₂ emission estimated or
 - Ex-post CO₂ emission measured

➔ 2 CO₂ emission values should be calculated: **Ex-ante and ex-post CO₂ emission**

Track & Trace at NDO

SAP TM at Norbert Dentressangle Overseas

■ Current Situation SAP TM 9.0

- Ocean Freight
- Air Freight
- CO₂ Calculation
- Track & Trace
- TM Reporting with BCV

■ Upgrade SAP TM 9.2

- Strategic Freight Management
- Collaboration Portal
- Asset Management

SAP TM General enhancements

Strategic Freight Management

- Strategic Freight Procurement (buying)
- Quote-to-Contract (selling)

Collaboration Portal

- Main coverage
 - Web portal for business partner collaboration on transportation and logistics processes / documents
- Role-specific views
 - Vendors, consignees, carriers and logistic service provider
- Collaboration support
 - Document access, review, planning and processing

Asset Management

- Tank Container

SAP TM General enhancements

Planning

- Visibility on direct shipment costs versus consolidation costs
- Incremental planning (allow additional freight and additional stops on FOR's in execution and planning in FOR's in tendering)
- Automatic trailer planning (drop & hook and swap)
- Buyer's / Shipper's consolidation

Charge Calculation

- Route based settlement
- Flexible invoicing
- Air freight specific enhancements

SAP TM Industries related enhancements

Ocean Freight:

- TM 9.1 supports bulk ocean freight scenarios with multiple pick-up and/or delivery locations
- Change port sequence on the ocean booking
- The lay days at every port can be maintained on the Freight Bookings

Air Freight:

- Capacity Management – new functionalities for uploading carrier flight schedules
- Connections flight creation with following sub-topics:
 - Location free text search
 - Usage of master light schedule
 - Information of length of stay for connection flight
 - Generate flight or specific time period
 - Creation of allocation
 - Visibility of connection flight information in Freight Booking
- Schedule Delta Handling and new Referenced Data Status field
 - Changes in air freight carrier schedules are reflected in already existing SAP TM schedules, allocations and freight bookings

SAP TM Integration related enhancements

EH&S – Integration (Dangerous Goods)

- 1000 Points Rule

GTS – Integration (Customs & Compliance)

- Customs Management
 - Customs processing
 - Transit procedures
 - Trade document printing
 - Customs communications
- SAP Compliance Management
 - Sanctioned legal control
 - Export legal control
 - Import legal control
 - Import declaration (SAP TM 9.1)
 - Quote-to-Contract (SAP TM 9.1)
- SAP Risk Management
 - Restriction handling
 - Preference processing

SAP Transportation Management

Integrated Freight Forwarder

Freight forwarding

Norbert Dentressangle Overseas is a provider of forwarding services, specialized in intercontinental air and ocean freight and associating supply chain management solutions.

Headquarters: Lyon, France

Industry: Transport and Logistics

Products and services: Global Freight Forwarding services

Revenue: €144M in Freight forwarding (€4 billion Norbert Dentressangle Group)

Employees: 900 in Freight forwarding (37.500 Norbert Dentressangle Group)

Web site: www.norbert-dentressangle.com

Live locations – Air & Sea Freight

Belgium since 01.01.2014 / Hong Kong since 01.07. 2014

Implementation 2014

Sea Freight : Ireland – NL – UK – US

Air Freight : Ireland – NL – UK – US -

Future roll-out plans

- Combined Air / Sea Freight solution globally over 14+ Countries

Implementation Partner: logventus GmbH

Business Challenges/Drivers:

- Replace existing legacy applications
- Standardization / Harmonization of business processes
- Reduction of manual work

Project Scope:

- TM 9.0 : Air & Ocean FCL/LCL Export and Import

Key figures:

- ~ 5 (Belgium), 900 users finally
- 200 forwarding orders per month
- 200 settlement documents per month
- 50 booking orders per month
- 100 freight orders per month

Key Highlights: Why SAP?

- Integrated end-to-end solution
- Unified ocean and air TMS platform

Benefits realized:

- Streamlined & standardized processes, Enhanced operational system functionality
- Automation or reduction of manual steps, Enhanced coordination of shipment processing
- Reduction of e-mails and calls
- Provide all needed and transport related information and print out documents

Installations:

- ECC 6.0, TM 9.0. Go-live Belgium 01.01.2014 [Sea & Air] Role-Out 2014+

Contact data: Michael Breusch (m.breusch@logventus.com), Managing Director

Reference Status: Official SAP TM Reference

Fact sheet:

TM customer Norbert Dentressangle Overseas

Customer information

| | |
|-----------------------------|--|
| Customer | Norbert Dentressangle Overseas (NDO) |
| Industry | Transport & Logistics |
| Customer description | Norbert Dentressangle Overseas (part of Norbert Dentressangle Group, global provider of supply chain services & solutions) is a provider of global forwarding services, specialized in intercontinental air and ocean freight. |

Project information

| Reference status | Official Reference |

Highlights / content

- **Project Start : 01.05.2013**
- **Go-Live: 02.01.2014**

Main Scenarios

- TM 9.0 : Supporting both Ocean, and Air Transportation processes.

Order Management

- Registering customer orders into TM forwarding orders
- FCL, LCL, (H)AWB are registered

Manual planning

- Used for FCL/LCL and Air for consolidated pickup, delivery and building of containers and ULDs

Invoicing

- Regular customer invoice (done by SD)
- Regular supplier invoicing with invoice verification (done by MM)
- Integration into ERP finance (FI/CO)

Others

- Ability to initiate workflows based on status
- Standardized master data

Process integration

- Integration to SAP ERP using PI
- Integration to external platform like DESCARTES

Thank you
