What are Mobile EAM and Field Service?

Mobile EAM

- Maintenance activity performed on owned assets
- High value equipment, asset / capital intensive industries
- Safety, reliability & productivity critical
- Challenging environments
- Poor or Limited Connectivity (wifi or public internet)

Mobile Field Service

- Maintenance performed on behalf of another party who owns the asset
- SLA compliance is critical
- Broad industry scope (services companies, consumer goods, public sector, high tech, life sciences, ...)
- Unreliable connectivity (wifi or public internet)

How does Mobilizing the business process drive value?

Address the key challenges in asset & service industries

- Lack of visibility & useful data
- Safety / Regulatory Compliance
- Costs of re-work and lost time
- SLA compliance breaches
- Breakdowns and unscheduled outages
- Equipment effectiveness / optimization
- Backlog reduction

How does Mobilizing the business process drive value?

Travel from office to job
Printing work orders
Picking-up/returning parts
Viewing asset history
Re-keying hand-written work orders
End of shift turnovers
Validating asset to be worked on
Notifying the office of a defect

Fewer terminals & printers Improved PM schedules Improved 1st time fix rate Extended asset life Reduced spares inventory Production uptime improvement Faster response times Improved accountability Reliability Centred Maintenance PM cycle optimisation Timely data entry/retrieval Business rule enforcement Reduced entry errors Accurate repair history Real-time status reporting Accurate labour accounting Want to own the applications Manage the devices remotely Need least cost routing To trouble shoot it easily Expand to new systems Need it to cope with new devices Security Multi-platform support

SAP's Mobile Asset Management Solutions

A Continually Evolving Solution Portfolio

Detailed roadmaps (updated June 1, 2015) are available at: <u>http://service.sap.com/saproadmaps</u>

<u>2013</u>

- Software business grows 5X in 2 years since acquisition
- SAP starts work on single 'SAP Mobile Platform' strategy
- Work Manager 6.0 & Service Manager 4.0 released on SMP 2.3

<u>2015</u>

- Shift to OS-based certification, release OpenScan SDK
- Deliver innovation & new capabilities to the core solution stack (e.g. master data & GIS enhancements, digital signature, etc)
- Begin transition to complementary HCPms capabilities
- In focus R&D topics include S4/HANA, Context Aware, Fiori UX, Wearables, next-gen iOS, Android & Windows)

<u>2012</u>

- SAP acquires Syclo in April 2012 → a strategic replacement for the MAM and MAU solutions
- Grew the Mobile EAM & Field Service business by 2.5x, expanded to APJ and Latin America
- Architecture based on the standalone Syclo Agentry platform

<u>2014</u>

- All applications platformed to fully leverage SMP 3 capability and development direction
- Two major releases for SAP Work Manager (v6.1 & v6.2)
- Major releases for CRM Service Manager, Inventory Manager and Rounds Manager → significant innovations delivered (Open UI, GIS integration, Visual Enterprise, etc)
- New OS capabilities delivered (iOS, Android, Windows WPF)

Considerations for Realizing Value

© 2015 SAP SE or an SAP affiliate company. All rights reserved.

This presentation and SAP's strategy and possible future developments are subject to change and may be changed by SAP at any time for any reason without notice. This document is provided without a warranty of any kind, either express or implied, including but not limited to, the implied warranties of merchantability, fitness for a particular purpose, or non-infringement

#1: Help solve the business' big problems

- Need to operate safely and productively in an environment of tight margins and constant change
 - Build benefit quantification in to investment proposals & project plans
 - Look across a range of value drivers: people, process, asset, IT & data
- Balance operating and capital expenditure, so cash is used most effectively
 - Ability to deploy in either (1) on-premise (upfront capital license buy); or (2) subscription purchase through a managed service vendor
- 3
 - Take advantage of the big innovations from geospacial, user experience, IoT, context aware services, etc
 - Leverage open standards to enabling extensions for customer-specific use cases & consumable services
 - Ensure tight integration with back-end EAM systems and HANA services for bi-directional consumption of asset data

© 2015 SAP SE or an SAP affiliate company. All rights reserved.

#2: Seek a total solution fit for your environment

#3: Manage Change

Manage change actively and deliberately \rightarrow adapt your approach from a 'proven' method

Take time to clarify <u>where</u> you are headed & <u>why</u> you are going there

Be patient and accept there will be challenges along the way. Learn & improve from experience
