# Agenda

---

## Basics and latest updates

- SAP S/4HANA Finance and SAP S/4HANA
- What's new with SAP S/4HANA 1610?
- User Experience with SAP Fiori 2.0

## Finance Processes

- Universal Journal
- Profitability Analysis
- Asset Accounting
- Receivables Management
- Payables Management
- Cash Management
- Planning
- Consolidation
- Reporting
- Central Finance

## Roadmap and additional information

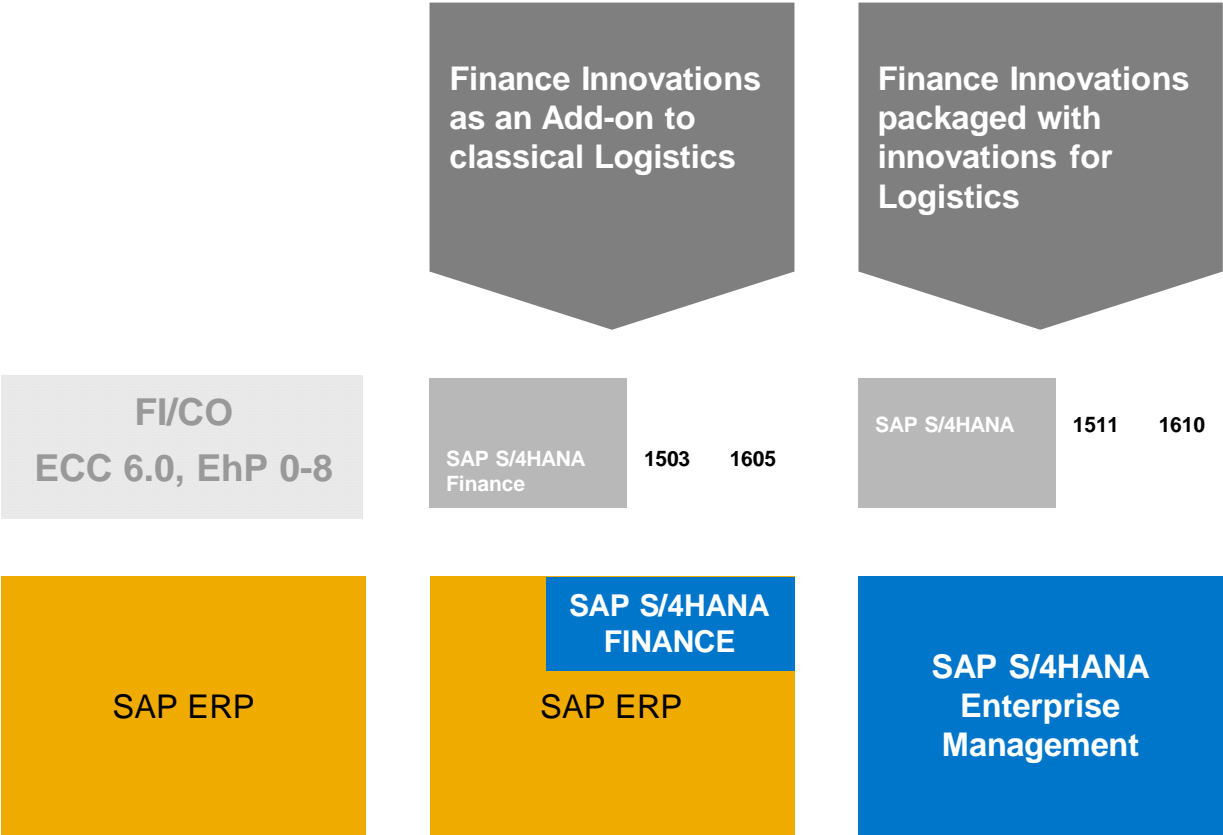

# Understand the basics

SAP S/4HANA Finance  
SAP S/4HANA

# SAP ERP, SAP S/4HANA Finance, SAP S/4HANA: different products

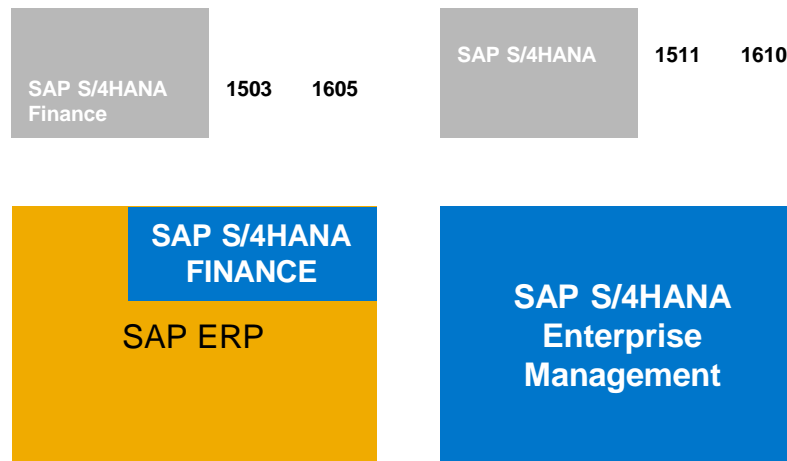

# SAP S/4HANA Finance, SAP S/4HANA: minor structural differences in Finance process setup

e.g.: mandatory implementation of

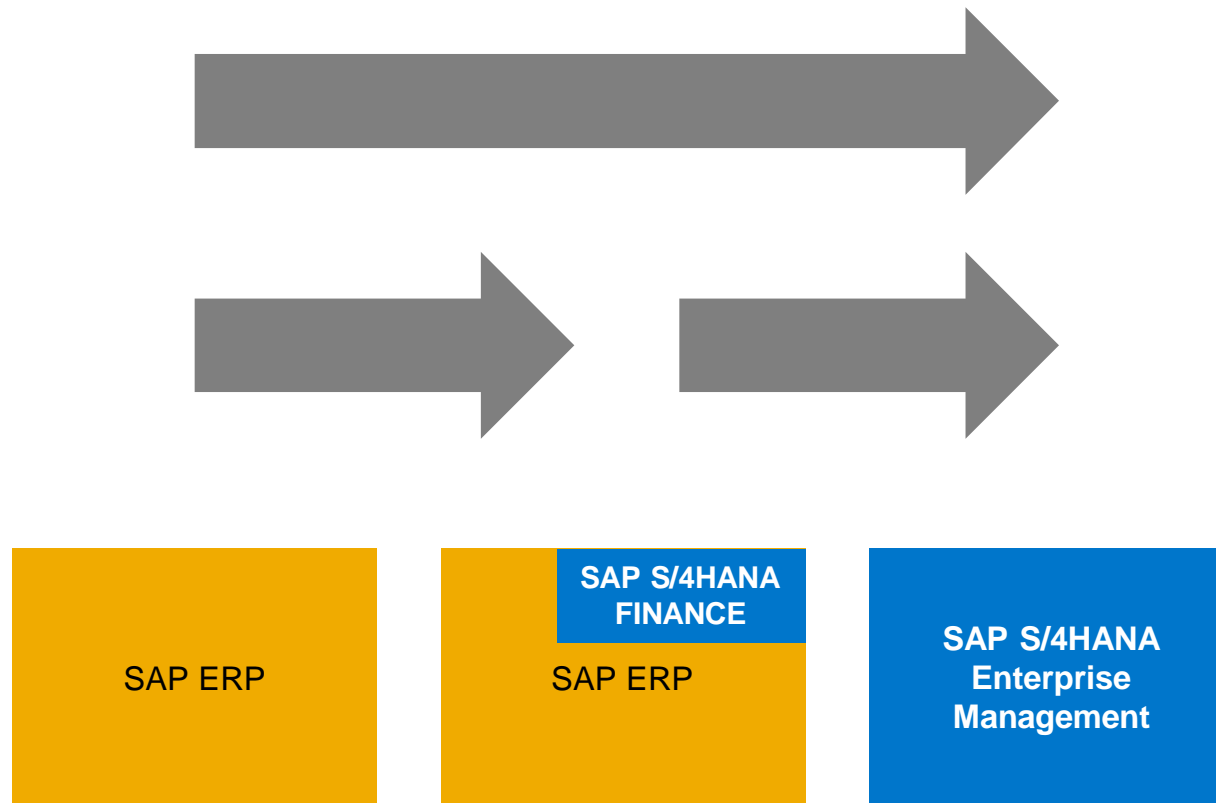

- SAP Business Partner instead of Customer/Vendor
- SAP Creditmanagement instead of Customer Credit Control (no separate license)
- Material Ledger for Material valuation
- Material number with 40 digits

**Automatically, technically converted**

# The way to SAP S/4HANA: via SAP S/4HANA Finance or directly

---

# What's new in SAP S/4HANA 1610?

# What's new with SAP S/4HANA 1610? Overview

major innovations, compared to SAP S/4HANA 1511

**1605** = introduced in SAP S/4HANA Finance 1605 already

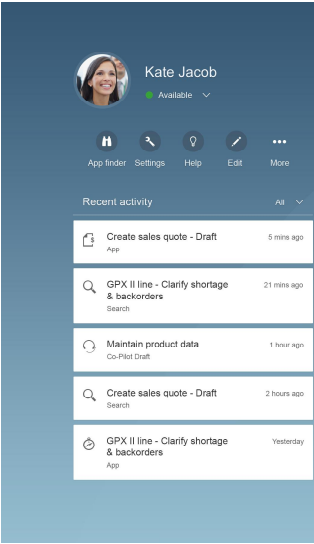

Area	New capability	Value
User Experience	Fiori 2.0	Increased productivity
Universal Journal	<b>1605</b> Multiple functional enhancements <b>1605</b> Unified Currencies and Transfer Pricing Subsequent introduction of parallel ledgers	Rich multidimensional, high-performance GL for comprehensive Reporting Facilitated setup and maintenance for increased transparency Enhanced flexibility in adoption
Profitability Analysis	<b>1605</b> Visibility of Details and Variances in Universal Journal Revenue Recognition reflected in Universal Journal for project-based services and real-time derivation of characteristics	Soft Close / Continuous Accounting on Entity Level: FI and CO Close match by design Costs and revenues always match, Profitability reporting always up to date
Receivables Management	KPI Cockpit for Managers (FI-CA) Silent Factoring (FI-CA)	Increased working efficiency improved performance, transparency, auditability
Payables Management	Integration to Business Networks	Increased automation, reduced error-handling efforts
Cash Management	<b>1605</b> One Exposure <b>1605</b> Details for Cash Position and Liquidity Forecast Centralized Bank Account Management	Consistent Cash reporting Consistent banks and bank account data are between central and target system
Planning	Cost Simulation Enhanced Content for Sales and Profitability Planning	Optimized performance Management
Consolidation	Embedded Real-time Consolidation	Support for Continuous Accounting on Group Level
Reporting	Production Cost Analysis Embedded Tax Compliance Apps Statutory Reporting Framework	Improved variance tracking and transparency to identify potential issues Ensure compliance Streamline and bundle reporting obligations
Central Finance	Replication of Changes, Mass Enablement, Reconciliation Reporting	Strengthen central steering capabilities on a secured basis

# Financial Close with SAP S/4HANA: Towards Live Business Insight

SAP Labs preview

## Hard Close

## Fast Close

## Soft Close

## Predicted Close

# SAP S/4HANA: Accelerated Hard Close

## Faster Insight on the basis of certain Improvements

- Elimination
- Real-time Execution
- Continuous Execution
- Acceleration (automatic tasks)
- Automation (manual tasks)
- Higher efficiency (manual tasks)

**Enable Faster Close with less effort**

# SAP S/4HANA: Enable Soft Close

SAP Labs preview

## Continuously be able to close the books

- Continuous Closing – enabling to run all tasks fast and easy in an automated series and eliminating period-end tasks
- Profitability characteristics are derived automatically during the posting so management information is available already during the period – no need to wait until month-end settlement is done.

**Live Insight is provided automatically**

# SAP S/4HANA: Predicted Close

SAP Labs preview

## Analysis on the basis of “Predicted Actuals”

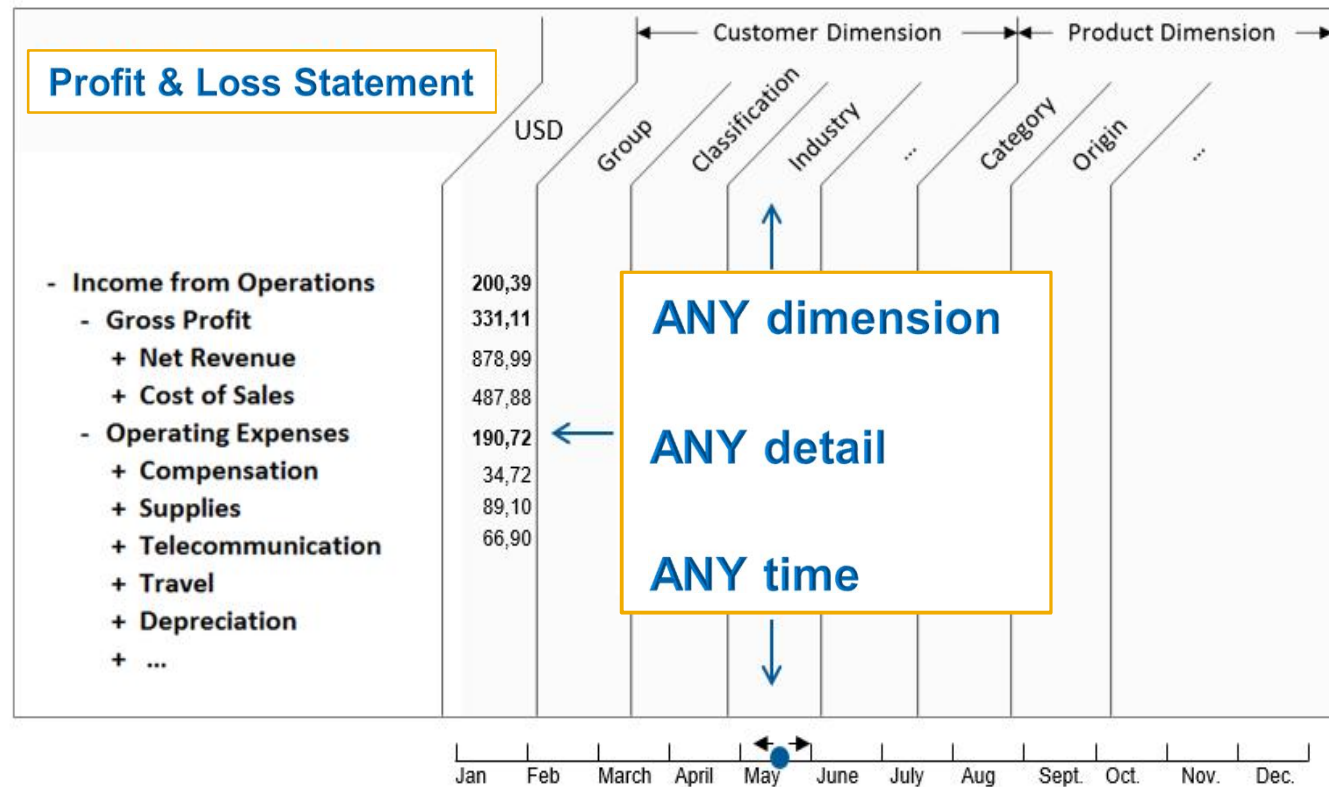

- Information of processes in progress, previous period data, manual adjustments, statistical methods
- “Predicted Actuals” are derived from these processes to already be able to predict and analyze the results at period end during the period

## Prediction on a stable ground

# Financial Close with SAP S/4HANA: Towards Live Business Insight

SAP Labs preview

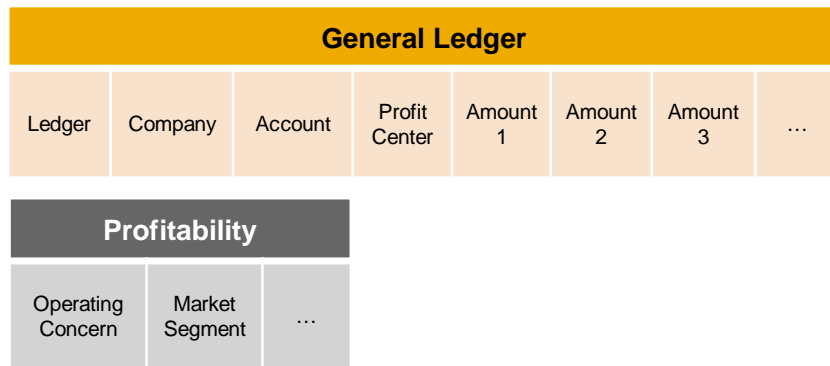

# Profitability Analysis

# SAP S/4HANA: Profitability Analysis

# SAP S/4HANA: Profitability Analysis

# SAP S/4HANA: Profitability Analysis

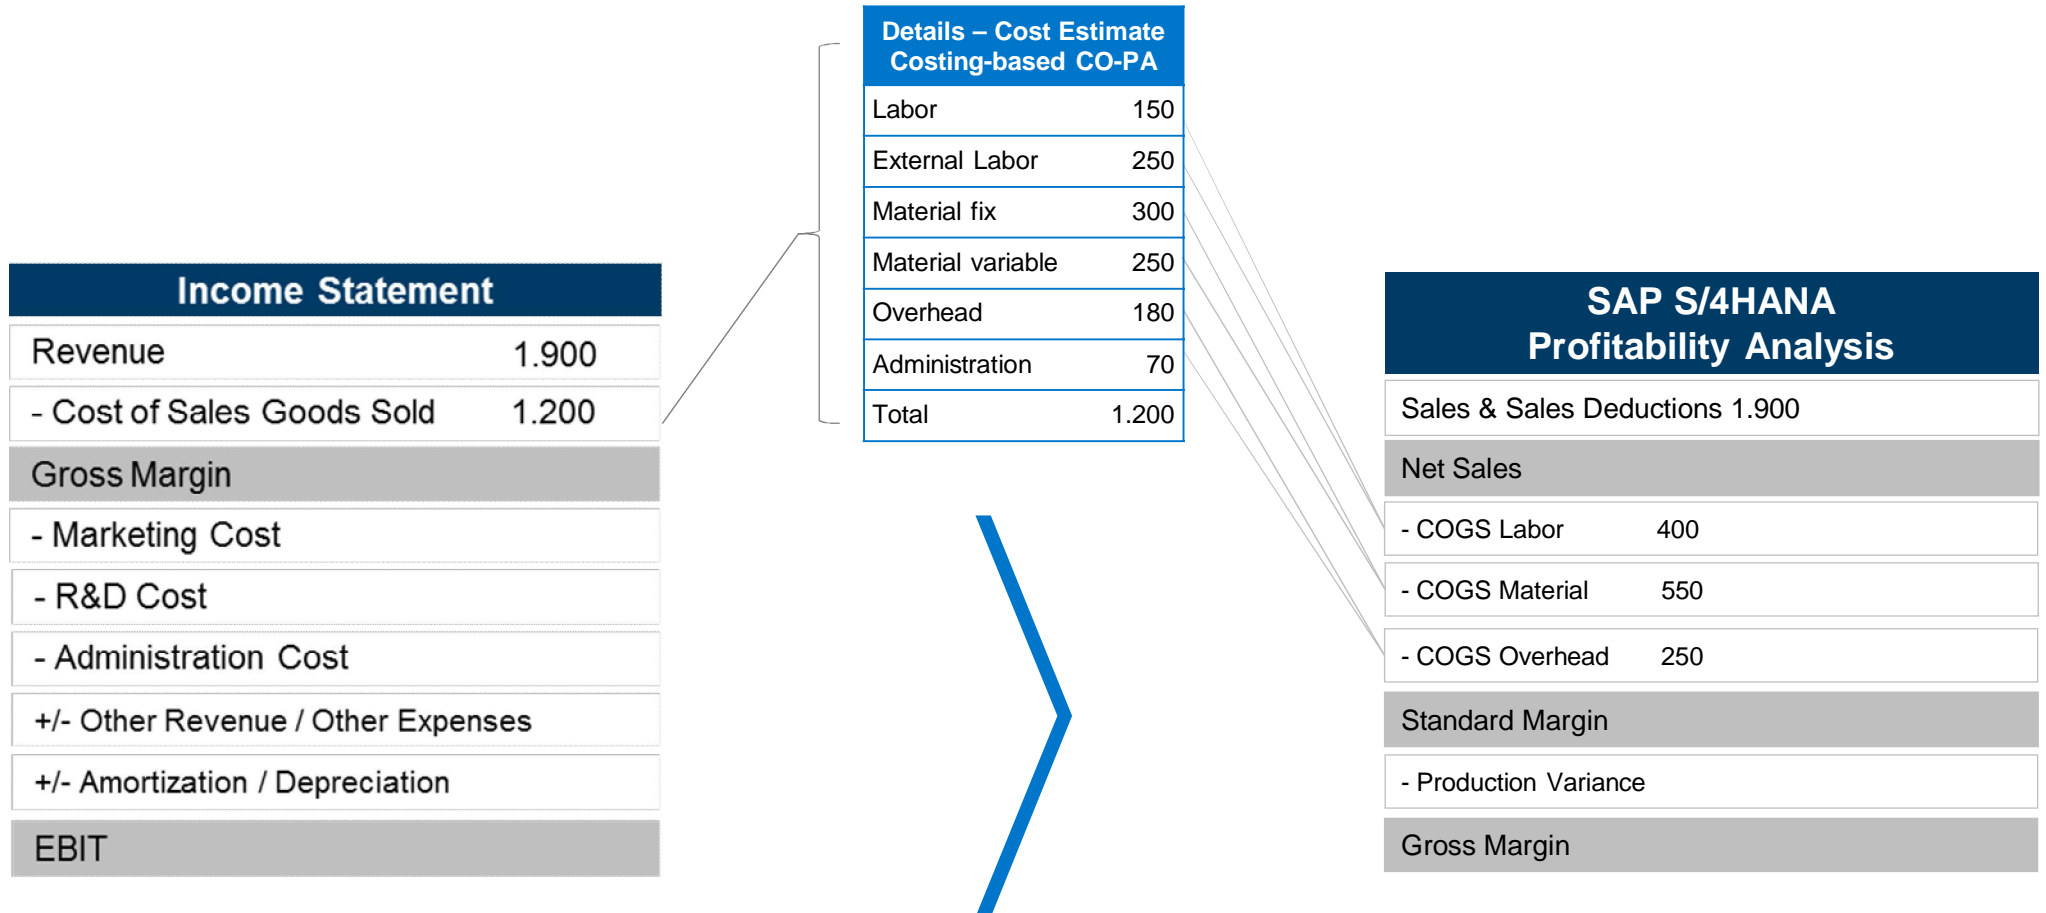

## Integrated, instantly harmonized profitability Analysis

- On the basis of the account-based CO-PA all values are stored in the Universal Journal
- Real-time derivation of characteristics
- Enriched income statement item with more characteristics
- Soft Close and Prediction

# SAP S/4HANA: Profitability Analysis

## Refinement of Cost of Goods Sold (COGS)

# SAP S/4HANA: Profitability Analysis

## Production cost variances

SAP S/4HANA	1511	1610
SAP S/4HANA Finance	1503	1605

Income Statement	
Revenue	1.900

# Cash Application Intelligence

## Automatically matching payments to open customer invoices

Account Receivable Team

### Business Problem

- Manually matching incoming payments to open invoices is a labour-intense process in today's accounting departments
- Currently, automatic matching rates vary from 30% to 90% depending on customer and country.
- Process improvement and automation ranks top 2 challenges for Shared Service Centres\*

### Key Message

- SAP boosts process efficiency by **automating tedious and repetitive manual tasks**, improving both service quality and accountant productivity

### Supporting Key Messages and Business Benefits

- Automatically learns from accountants' actions and applies it to future payments
- Enables substantial reduction of labor cost per invoice and faster clearing
- Automation shifts effort towards better service quality

\* The 2013 Winshuttle Shared Services Survey

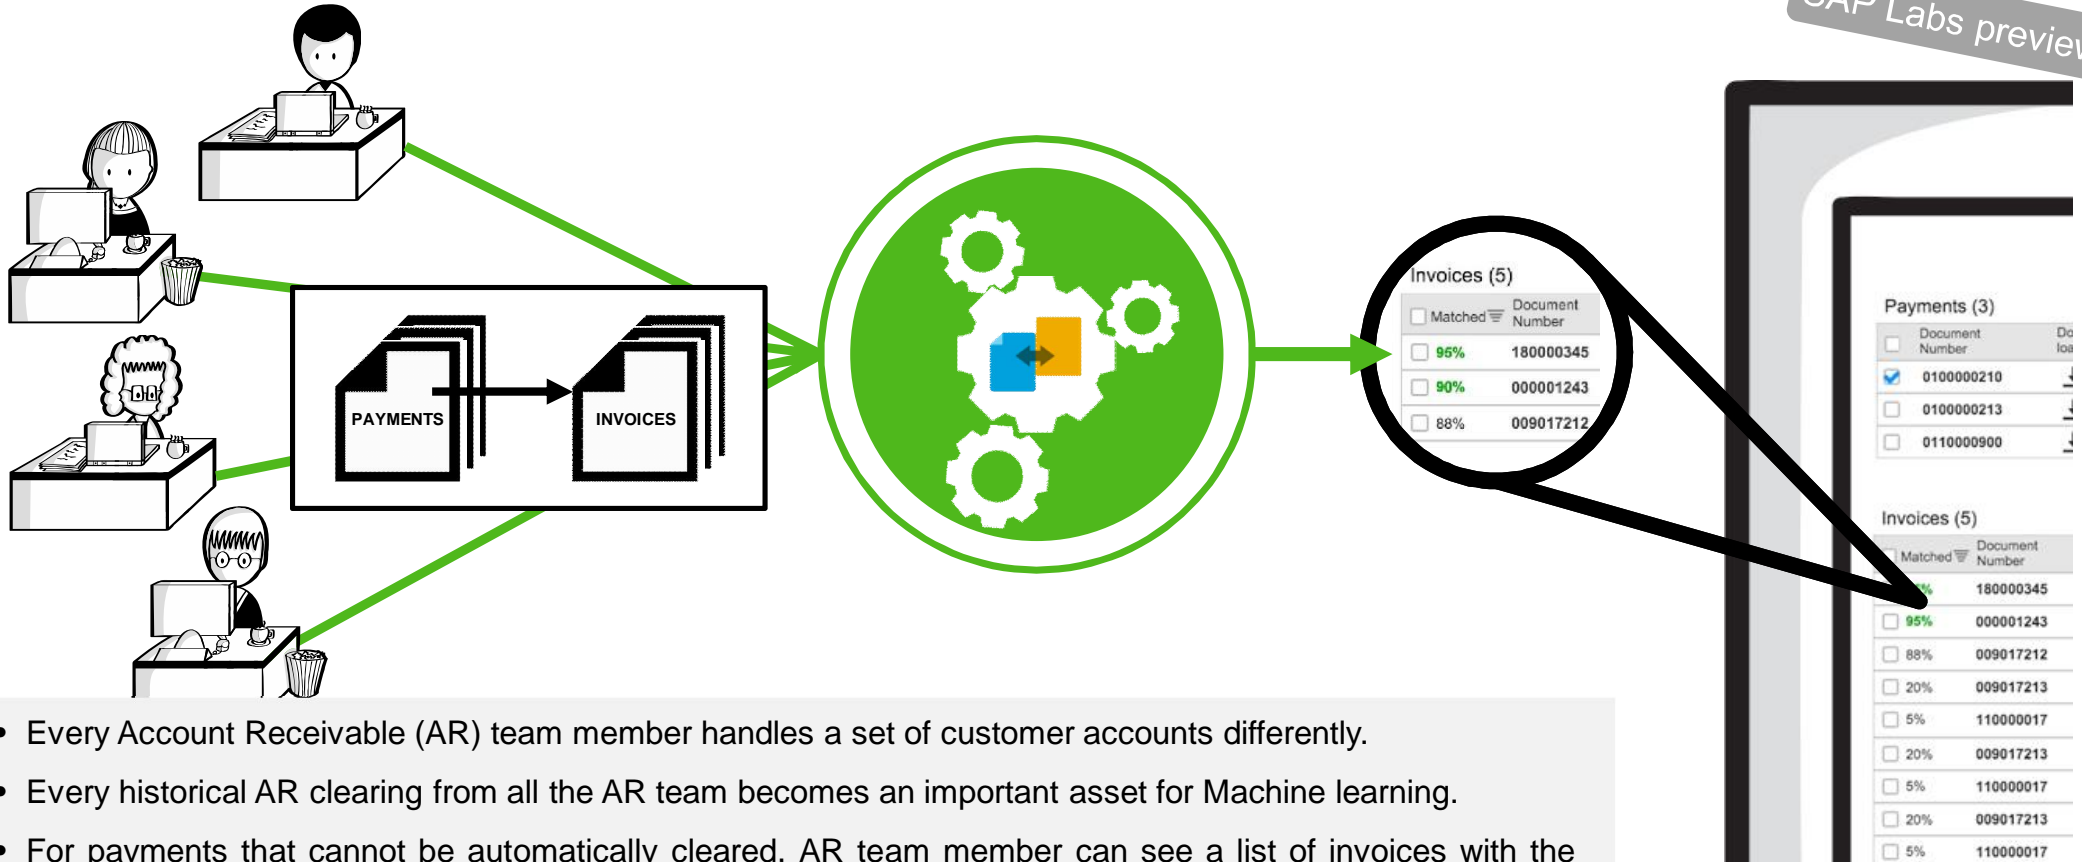

# AR Accountants have multiple challenges to match invoices with payments

- Payment and invoice not matching.
- AR accountant needs to manually match them.
- This process is too time consuming.

# Solution! – Cash Application Intelligence

SAP Labs preview

- Every Account Receivable (AR) team member handles a set of customer accounts differently.
- Every historical AR clearing from all the AR team becomes an important asset for Machine learning.
- For payments that cannot be automatically cleared, AR team member can see a list of invoices with the suggested ratings.

# Learning from historical data

SAP Labs preview

## Historical Information as Input

Electronic Bank Statements  
Accounting Documents  
Payment Advices  
Customer Master Data  
Bank Master Data  
House Banks  
Payer bank account information  
Clearing data for electronic  
bank statement line items

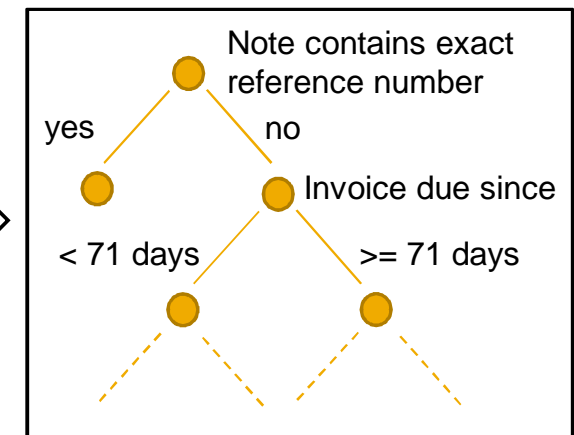

## Training

**Automatically select and arrange  
decision criteria & values**

**Currently supporting 48 matching  
criteria & growing**

## Optimal model

# What we are looking for and what we offer

## Call for Co-Innovation

### What we are looking for

- Co-Innovation customers to provide feedback on business requirements for our projects
- Co-Innovation customers who share their data sets with us to participate in an early stage of product development

### Planned activities

- Regular status update calls/meetings
- Test-run Machine Learning algorithms on customer data
- Review and discussion of the results with customer
- Virtual or on-site Design Thinking activities to gather and validate requirements, e.g. interview with subject matter experts or workshops

### What's in it for you

- Assess latest algorithms with your own data to validate business benefit
- Convert your data into valuable assets
- Unlock the power of your own data for increased automation

# Payables Management

# SAP S/4HANA: Payables Management

## End-2-end automation

- Native connection to Business Network (Ariba)
- Full automation of entire invoice process
- Increase productivity

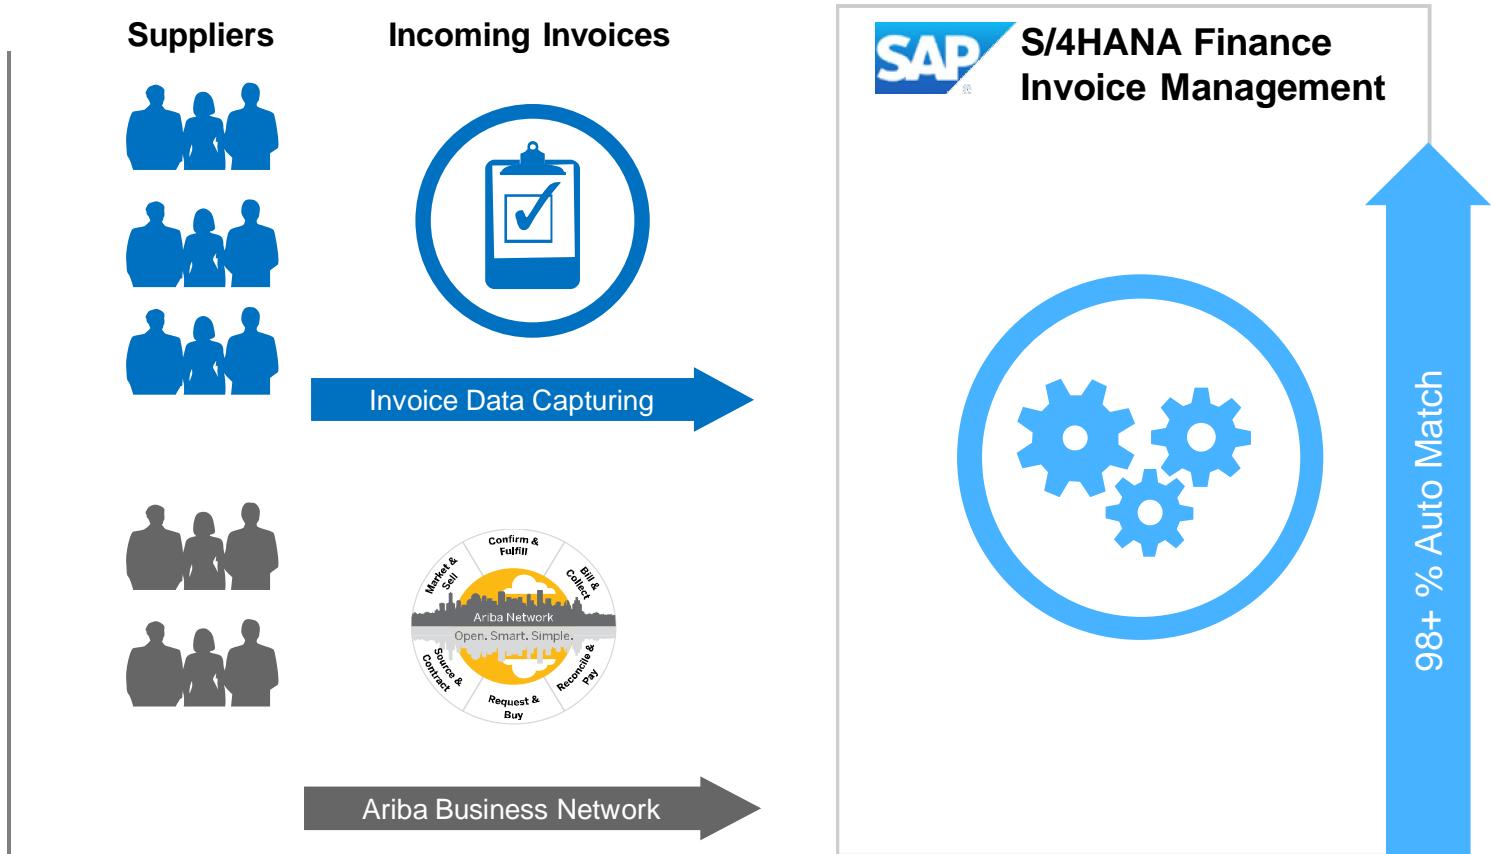

**Suppliers  
& networks**

# SAP Invoice Management in a Digital Economy

For the teams doing **Invoice Management Reconciliation** this means:

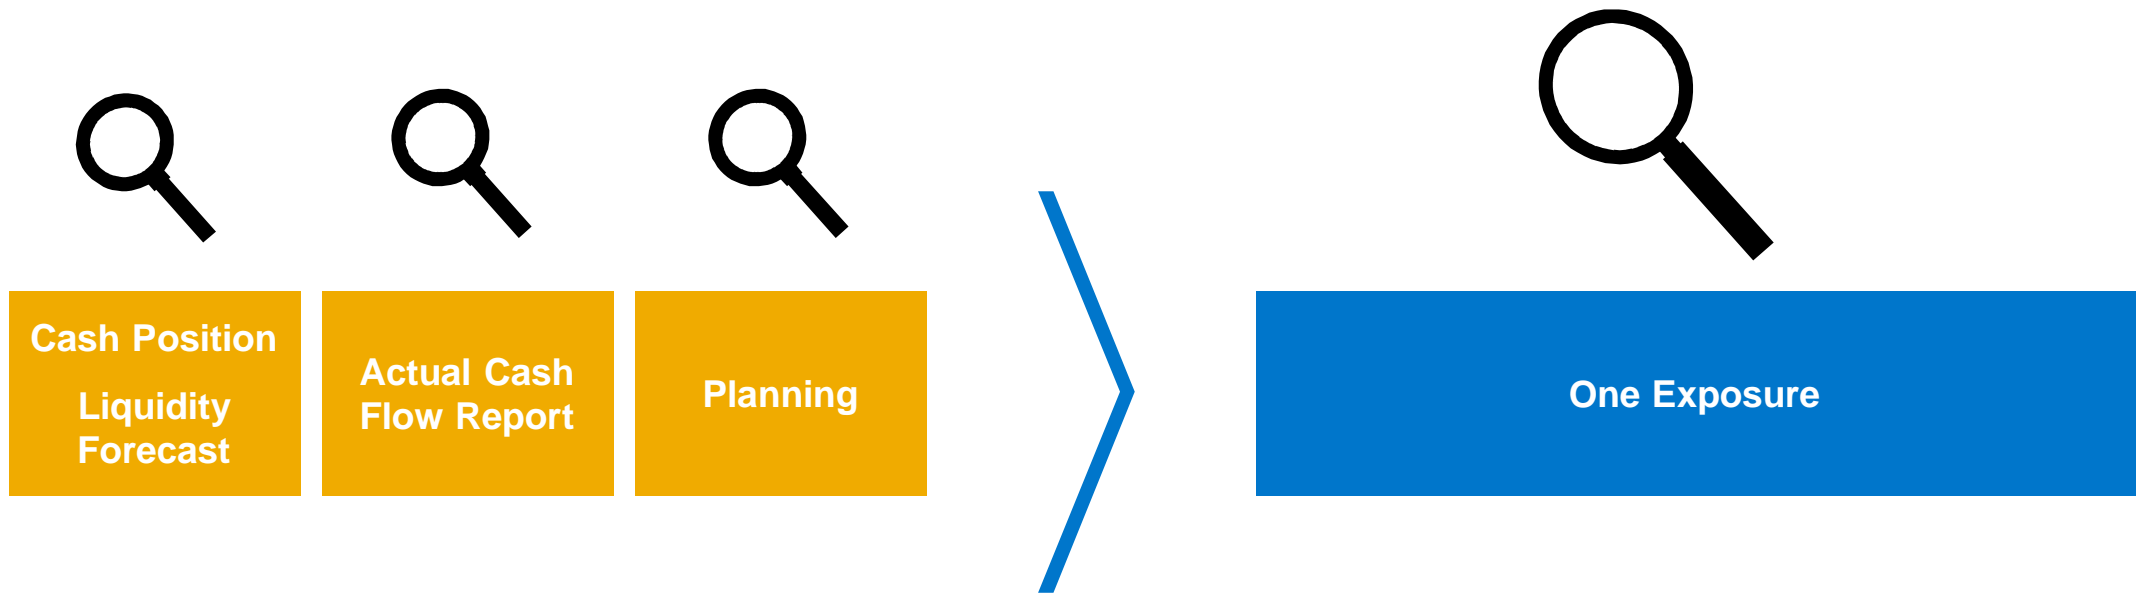

- Increasingly higher Invoice volume is handled through **business networks**
- Transactions have detailed digital records that can be used for **process automation**
- Collaboration expectations are higher than ever to **optimize the business**

# Cash Management

# SAP S/4HANA: Cash Management

# SAP S/4HANA: Cash Management

---

## **Integrated, instantly harmonized Cash- and Treasury Management**

- Detailed insight into daily cash positions
- Dynamic Liquidity Forecast and Cash-Flow-Analysis
- Central Bank Account Management

**One Exposure**

# SAP Cash Management

## Enhanced Functionality

SAP S/4HANA	1511	1610
SAP S/4HANA Finance	1503	1605

### Cash Position Details

- Multiple day view in one page
- More dimensions (planning level, G/L account, summarization term, planning group)
- Allow end user to personalize the layout for analysis
- Simplify the backend for better performance

### Bank Account Management

- Improved usability for countries only using IBAN
- Configuration to split mass change signatory request per country/per account type
- Easier configuration of field status group

### Liquidity Management

- Pre-configured app “Liquidity Forecast Detail”

### One Exposure

- Integration to MM and SD

The screenshot displays the SAP Cash Position Details app interface. At the top, there's a navigation bar with the SAP logo and a user profile for William Cao. Below this, the title 'Cash Position Details' is centered. The main area shows a table with columns for dates from Tuesday, August 4, 2015, to Monday, August 10, 2015, plus a 'Late' column. The table is organized by 'Liquidity Item Name' and 'Bank Account'. It includes various currencies like AED, CAD, CNY, and EUR. The data is presented in a clear, structured manner with expandable sections for different bank accounts and currencies. The bottom of the screen shows a dark navigation bar with icons for different app functions.

# Planning

# SAP S/4HANA: Planning

---

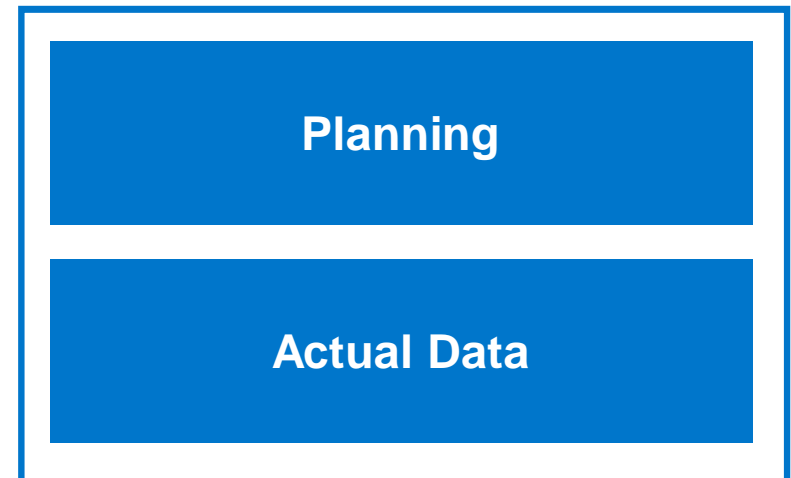

## SAP BusinessObjects Planning and Consolidation for S/4HANA

**Planning, Budgeting, Forecasting entirely integrated, while remaining flexible:**

- Direct access to all data (actuals, master data)
- Flexible planning  
Level, Periods, preliminary master data, Workflow, comments, Excel-Frontend
- Simulation, Scenarios

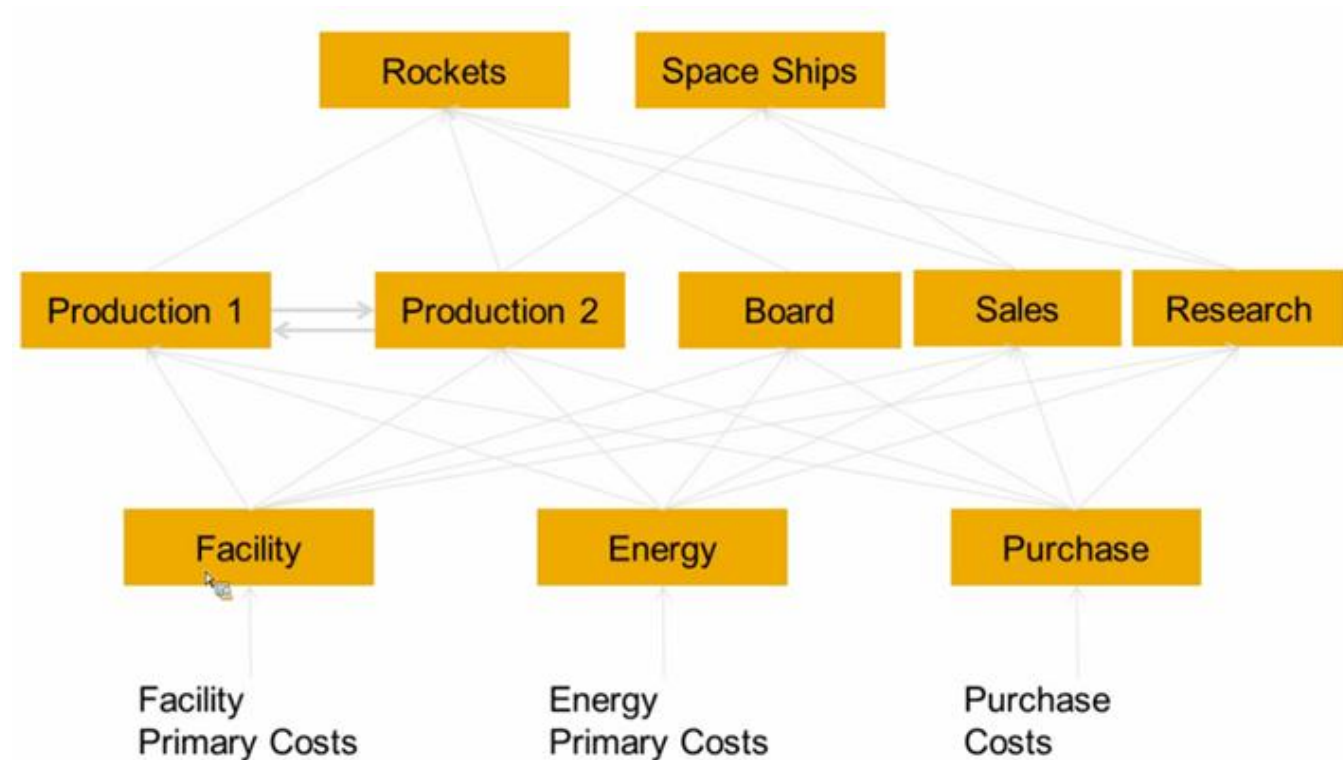

**“Planning is coming home”**

# SAP S/4HANA: Planning/Simulation

- Maintain primary costs of cost centers
- Maintain the input / output relations in a network of cost centers based on fixed amounts or quantities
- Simulate the final distribution of costs as part of the planning cycle
- High speed of simulation via planning function SAP HANA

## Cost Simulation – Example Scenario

# Integrated Planning

Recent / Planned Innovations

## Recent Innovations\*

- Simulation of cost allocations
- Cost center tariff planning
- Activity consumption planning
- Cost center fixed consumption planning
- Sales & Profitability Planning (First version)
- End-to-end Extensibility

## Planned Innovations

- Profitability Planning
- End-to-end Profitability Simulation incl. product cost simulation
- “Object based” planning on ACDOCP

## Future Direction

- Integration of Business Objects Cloud for Planning
- Integration with IBP for S&OP

This is the current state of planning and may be changed by SAP at any time.

# Consolidation

# SAP S/4HANA: Consolidation

---

# SAP S/4HANA: Consolidation

## SAP BusinessObjects Planning and Consolidation for S/4HANA

### Statutory and Management Consolidation:

- Direct access to all data (actuals and master data)
- Support to facilitate process steps (data acquisition, validation, intercompany)
- Simulation, Scenarios

= heading for „Continuous Accounting“  
from entity to group close

# What are the advantages of Real-Time Consolidation?

## Data Quality

Postings can be checked **continuously** against **central validation** rules

**Shared Master Data** and Rules for entity and group closing

## Speed

Necessary **adjustments** can be done locally and results are provided **immediately for consolidation**

Certain consolidation steps can be performed **before** the consolidation (e.g. currency translation)

## Transparency

Fully enabled Drill-through from consolidation to the line-items of the entity (instead of transformation in multiple systems)

*„Single Source of Truth“*

Consolidation of free-of-choice dimensions

# Real-Time Consolidation

## Basics

- Enhancements of operative master data for consolidation
- Direct read and write access
- Accrual step to freeze data set

## Data preparation

- Continuous data validation on local postings\*
- „Pre“-currency translation in local postings
- Additional data load
- Intercompany-Reconciliation

## Consolidation

- Eliminations after Intercompany-Reconciliation\*
- Continuously driven eliminations, e.g. in P&L\*
- ...

SAP BPC optimized for SAP S/4HANA - Consolidation

\* planned enhancements in the future

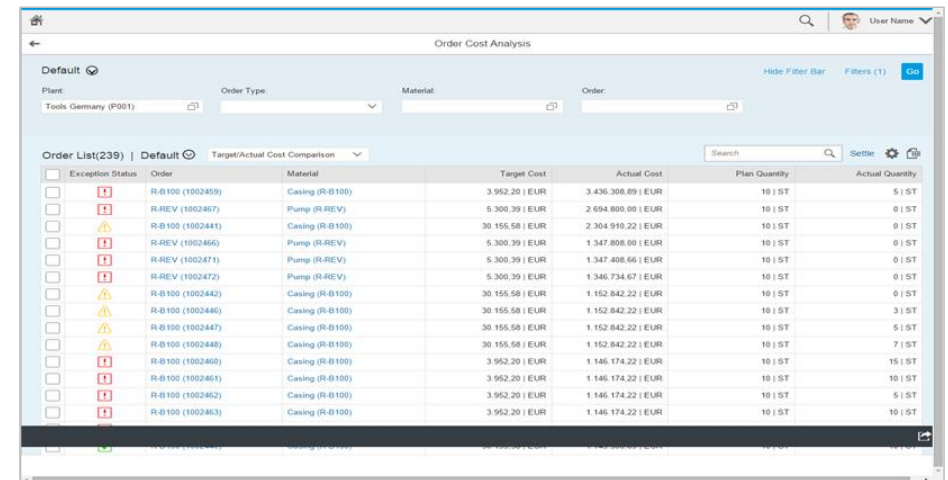

# Reporting

# SAP S/4HANA: Production Cost Analysis

## Business reporting content for Instant insight and improved decision making

- The centralized cockpit-like approach to viewing KPIs supports variance tracking to identify potential issues.
- The improved variance tracking helps you to isolate causes and ensure costs are being captured correctly in all processes and orders.
- Additional information helps you to analyze both overall and detailed costs to make sure actual production costs are close to target costs.

Exception Status	Order	Material	Target Cost	Actual Cost	Plan Quantity	Actual Quantity
	R-B100 (10024509)	Casing (R-B100)	3,952.20   EUR	3,436,308.89   EUR	10   ST	5   ST

# SAP S/4HANA: Tax Reconciliation Account Balance

## Business Compliance reporting content for Instant insight and improved decision making

- Overview tax relevant postings filtered by number of filters including Company Code, Tax Code, Fiscal Year or Posting Dates
- Verify that tax relevant accounts are posted with tax attributes
- Verify that posted tax amounts correspond with app-calculated VAT amounts
- Identify the source of inconsistencies in Tax postings

The screenshot shows the SAP S/4HANA Tax Reconciliation Account Balance interface. The top navigation bar includes 'Home' and various tabs. The main area displays a grid of tiles, with 'Tax Reconciliation Account Balance' highlighted in a red box. Below the grid, the 'Tax Reconciliation Account Balance' screen is shown with filters for Company Code, Fiscal Year, and Tax Code. The 'Tax Code' filter is set to 'V1'. The 'Fiscal Year' filter is set to '2016'. The 'Posting period' filter is set to '06'. The 'Difference Mark' filter is set to 'Items With Differences'. The main table displays 'Account Balances for Journal Entries with Tax Codes (31)'. The table has columns for G/L Account, Posting period, Tax Code, Tax Code Name, Amount in LC, Tax Amount, and Calculated Tax. The table shows data for G/L Accounts 31010, 154000, 159000, 400000, and 479000. The 'Journal Entry' column shows the entry '1500001979'.

G/L Account	Posting period	Tax Code	Tax Code Name	Amount in LC	Tax Amount	Calculated Tax
> G/L Account: 31010				-400.00 EUR	-12.00 EUR	-60.00 EUR
> G/L Account: 154000				100.00 EUR	20.00 EUR	15.00 EUR
> G/L Account: 159000				1.008.69 EUR	151.31 EUR	151.30 EUR
- Tax Code: V1		V1		1.008.69 EUR	151.31 EUR	151.30 EUR
- Journal Entry: 1500001979		V1		1.008.69 EUR	151.31 EUR	151.30 EUR
159000	06	V1	15% domestic input...	1.008.69 EUR	151.31 EUR	151.30 EUR
> G/L Account: 400000				3.011.29 EUR	421.70 EUR	451.69 EUR
> G/L Account: 479000				10.98 EUR	2.34 EUR	1.62 EUR
				3.730.96 EUR	583.35 EUR	559.61 EUR

# SAP S/4HANA: Statutory Reporting Framework (SRF)

## Streamline and facilitate statutory Reporting

- Compliance Monitor
